Welcome to Bieber Fever VI,

First of all we want to thank you for taking the time to look through our catalog and evaluate the offering. We understand that your time is valuable and we have made our best effort to provide you the information in the most up to date and concise way. If we can provide you with anything that you need we would be happy to, just give us a call.

Our offering is as stout and deep as it's ever been. We have been increasing the size of our ET program and it has increased the quality through out the offering. We really believe that as you go through the offering, top to bottom, you will find really good bulls all the way. We are confident that any cattlemen will be impressed with the quality.

We said this last year, but these days progressive seedstock suppliers have a flair for advertising every alliance they can. Our priority is our personal alliance with you, our customer, and that continues to remain at the top of our list. We continue to take the time necessary to explore new networking and marketing avenues/alliance so that you as our customer will have access to some of the most progressive marketing opportunities in the country. Customer service is one of our highest priorities that means do not hesitate to get in touch with us via email or phone calls anytime, concerning your calf crop or the cattle you purchase. Feel free to come to our place and explore our operation anytime. We urge you to let us know if you would like us to visit your operation to have a conversation about your cattle or your purchases. We believe that one on one is the best way to discuss your marketing options.

This year over 90% of the bulls in the offering have been 50K tested. We believe that this is the best way for us to give you more reliable data that will insure your success with our genetics. Larry Keenan from the RAA and Larry Gran from Zoetis will be on hand sale day to answer and questions you have about genomically enhanced EPD's and the improved reliability of them.

Lastly I would like to note the passing of Terry Robinson in May last year. Terry had a huge impact on my life and our program. I relied on Terry for advice on marketing and the direction of our program. There hasn't been a day that while preparing for the sale last fall and this winter for both sales that I didn't think to myself what would Terry say. We had a tradition of talking early a lot of mornings about sales and the offerings. He will be missed by me and many others this spring. I know that he rests in peace with the Lord.

Thanks for taking a look at our program. We appreciate the opportunity for the time you have taken to take a look at this offering.

Craig & Peggy Bieber

Ron & Lois Bieber

DELIVERY POLICY:

Free delivery on all purchases over \$3000, to central points to surrounding States. Volume purchases by one buyer of 5 over \$3000. All bulls under \$3000 and females will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogryposis Multiplex(AM) (Curly Calf Syndrome), and Neuropathic Hydrocephalus (NH). With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyers convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE:

We scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard

conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. This recommendation is a system we use to help our customer with calving ease selections.

Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year-study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD and BW EPD.

FEEDING:

Feeding arrangements are available on all yearling lots will be fed at a charge of \$3.00 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding Soundness evaluations will be performed in February before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2014 if the bulls are managed properly. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. We will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups.

WEANING WEIGHTS:

All naturally born calves born at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day. Please see information in catalog.

SALE INFORMATION

AIR TRANSPORTATION:

Aberdeen is serviced by Delta Airlines. Pierre is serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING:

We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line which can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service, such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAAuction below.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR:

All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE:

Everyone is invited to Dinner at Ron & Lois's after the sale. We will be serving strip loin.

Updated Information, Yearling Weights, and Ultrasound Data:

All yearling bulls will be ultrasounded, and updated carcass EPD information will be available the week before the sale or as soon as we receive it from the Red Angus Association of America. Yearling adjusted scrotal size on January 20, 2014 is printed in the catalog and an updated scrotal taken the week prior to the sale will be available. The scrotal in the catalog on all yearling bulls is adjusted by the Red Angus Association of America. We generally find actual scrotal measurements at sale time are typically 1 centimeter larger than the adjusted measurements. All other data not provided will be available upon request.

GAIN TESTING:

All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September and weighed off test January 20.

INFORMATION:

Supplement sheets will be available 3-1-2014 on the website or upon request.

SALE ORDER:

The sale order will be catalog order.

COOPERATORS:

In order to provide a better selection of cattle we have enlisted the following people who have herds that are aligned through genetics and management.

Dan Bormann 515.520.7707 (Name Prefix Rouse)	Huxley, IA	Red Angus
Gene Rouse 515.231.9129 (Name Prefix Rouse)	Huxley, IA	Red Angus
Leroy Bieber (Name Prefix Bieber LB)	Leola, SD	Red Angus
(Leroy's cattle are run at Bieber Red Angus)		
Caleb Acciaccia (Name Prefix Bieber ACC) 906.395.7377	Baraga, MI	Red Angus
Jordan & Kelly Rhodes 605.228.9301 (Name Prefix RREDS)	Faulkton, SD	Red Angus

DVAuction
Broadcasting Real-Time Auctions

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAAuction web site at www.dvauction.com or call 402/474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale.

After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAAuction at (402)-474-5557 or e-mail support@dvauction.com. We recommend that you register by March 6, 2013 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

MEET THE PEOPLE OF

Bieber Red Angus

Ron Bieber: Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

Lois Bieber: Co-Founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities

Peggy Bieber: Craig's partner and now full time office staff, handles all bookkeeping, cattle records, and clerks the sale.

Craig Howard: Cowboss, AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Kenny Meidinger: Equipment manager, responsible for feeding and forage at the ranch.

Michael Chapman: Herdsman, general ranch duties, light mechanics.

Caleb Acciaccia: Caleb was a calving intern for us a few years ago and now has come on full time.

Skylar Schumacher: Skylar has been working for us for a couple of summers and has started to help us on weekends while finishing high school at Roncalli in Aberdeen.

Eric Payne: Day help hand. Eric and Megan are now living at Mina Lake and he sells insurance for Insurance Plus in Aberdeen. Check out the ad in this catalog.

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Newest member of the Bieber Red Angus family and daughter of Eric and Megan Payne.

Kristin Payne: Office/all-around assistant. Graduated from Augustana College has a full time job at Raven Industries in Sioux Falls, SD. Helps clerk the sale.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year.

Steve Kaiser: Intern for a year returning to South Africa in July 2013.

Scott Marwick: Intern for a year returning to South Africa in July 2013.

Cody Luthy: Spring Intern. Cody arrived the week of the March 2013 sale and returned to Nebraska in June 2013.

Lot 1's sire Pardinga Iron Ore E27 may be one of the most successful outcross sires to come around in a few years. Lot 1 stacks the great Tina cowline that has consistently produced the front end sires every year at Bieber Red Angus. Lot 1's dam, 276Y sold to my uncle Leroy, for whom we run some cows and was a bargain at \$3000 when she sold in 2012. The Roosevelt daughters are going to be known for their great maternal package. This son has all the opportunity to make a herd move forward with cutting edge data and a fresh pedigree for the Red Angus breed. We started to list the customers that have benefited from the Tina cowline and the list is very long and includes many of our commercial buyers.

Takeover 9943W has shaken things up and we feel lucky to have been able to be the original owner to have found him. We purchased Takeover in the Ludvigson sale in 2011 and used him cleanup on heifers. Last year 13 sons averaged \$6962 and really found the top of the offering. Lot 2's dam sold to cooperator Jordan Rhodes. We are starting the sale this year with the progeny of two females that were offered through our female production sale. We know every females doesn't work out like these, but we have offered some pretty great opportunities in these offerings. The genomically enhanced data on Takeout puts him in some pretty exclusive company with 9 traits in the top 25% or better.

This Epic son was born light, and really hit the ground running. Lot 3 was a standout all summer and was both Gene Rouse and Dan's (Gene's Herdsman) favorite bull all summer. He has a tremendous EPD spread with balanced maternal and carcass traits. His dam is currently a donor for Rouses and is out of the same cowline as lot 2. The Flower 7732 was a power house and a cow we obviously should have flushed but we are fortunate to have smart cooperators who recognized the value of these cowlines and kept them in the system. Flower T21 has average progeny ratios of: BWR 5@95, WWR 5@103, YWR 4@102, Marbling ratio of 4@104, REA ratio 4@102. Epitome A33/A577 has 9 traits in the top 25% of the breed and is going to be a real leader.

We had a lot of trouble trying to figure out which of these Epic R397 sons to put first, and to tell the truth we still don't know. What we do know is A123 has done everything right and definitely earned a spot at the top. Epic A123 is long and smooth made just the way you want a calving ease bull to look, with enough power to put some pounds on a calf crop and posts 8 traits in the top 25% or better.

High growth Epic son who stood out all summer long. If you are looking for a sire to put a lot of weight on the scale this one did it with one of the largest actual weaning weights. We allowed Gene the opportunity to pick several cows out of the Basin purchase and Lot 5's dam was one of Gene's top picks. Lot 5 is one to watch if you need to be at the top end for muscle.

Bieber Packer A505 brings more birth weight to the table but we guarantee everyone will find him on sale day! Lot 6 is a full brother to Bieber Steakhouse Y165 who sold to Semex in 2012. If you have a set of cows that need some extra dimension and muscle not to mention a big boost in the carcass department don't let this bull get away! Full brothers sell as lots 17 and 181. Maternal brother sell as lot 26, 61 and 109.

Powerful may be the best word to describe Lot 7. Bieber Real McCoy A141 has a genetic package that will push a set of cows to the next level in performance and leave a set of daughters second to none!

We flushed lot 8's dam and for good reason. This calf is a little younger than most of the bulls and has kept pace with the rest. This Roosevelt W384 son is going to get noticed as you walk thru the pens on sale day. Lot 8 is a prime example of the traits not measured like muscle expression, disposition, and foot and leg structure and why we think so highly of Roosevelt. Maternal brothers sell as lots 124 and 195.

We have a set of ET calves that are younger than the natural born calves but what a set of calves they are! This Roosevelt W384 son out of one of the top cows we got in the Basin acquisition. Thick made, plenty of muscle in a moderate package. The kind you want to keep all the daughters from. Maternal brothers sell as lot 60 and 91.

Video clips of the cattle will be available.
 Visit www.bieberredangus.com for details.
 Thank you for your support!

Hard Drive Y120 sold to Select Sires in 2012 and we had the opportunity to sample him as a cleanup sire. After his first calves hit the ground we knew we needed to use him harder and are expecting more AI calves out of him in 2014. Lot 15 has his sires look and will turn a lot of heads. Take a look at this clean fronted wide based heifer bull.

We mated some Durham cows to Simmental sire with the idea to produce hybrid bulls and Lot 16 is the first of them to sell. A227 is a power house with all the extra muscle you can find. If you are looking to add some pounds to your next calf crop take a look at lot 16.

Everyone is invited to dinner at Ron and Lois after the sale. Our friend and partner Stu Campbell will be cooking Strip Loin for everyone.

Oly 903 has been a great sire for us and without a doubt the leading son of Red SSS Oly 554T. Oly turns the curve hard from Birth to Yearling. Lot 72 has a solid Daphine cowline behind him and his granddam is the result of our ET program which is the core reasons we have pursued flushing the great cows to make more dams with the prepotency of lot 72's dam.

The Rancher's Guide to 50K

Bull selection is one of the most significant decisions ranchers make in terms of influencing the overall profitability of their operations; therefore, Red Angus strives to deliver reliable genetic predictions to stakeholders to ensure producers are making the most informed decisions possible in pursuit of production goals.

For years, ranchers utilizing Red Angus EPDs (Expected Progeny Differences) in their selection decisions have enjoyed the built-in reliability and risk reduction provided through the breed's early adoption of Total Herd Reporting (THR) data. To further advance EPD accuracy and reliability, Red Angus can now incorporate 50K genomic data.

For generations, animal breeders have relied on phenotypic measurements to determine what the animal possesses at the gene level. Now, with the inclusion of 50K genomic data, we can actually measure the impact of identified gene effects before the weight or measurement is ever recorded.

Red Angus' new 50K test proves to be a game changer.

- **Ensure your yearling heifer bulls are "calving-ease specialists."**
- **Confirm your cowherd-building bulls have optimal genes for maternal traits.**
- **Make certain your carcass bulls are superior grid producers.**

Information gained from 50K genomic data and Total Herd Reporting data provides Red Angus stakeholders' EPDs with unsurpassed reliability.

WHAT IS ZOETIS 50K AND HOW DO I USE IT?

Most of us have read how DNA has changed the game in Livestock Evaluation. Most of us have tried to read the scientific explanations on how it works. Simply put, cattle that excelled in specific traits were tested, and DNA identified the genes (or markers) that superior animals had in common.

For example, let's look at Weaning Weight (WW). Many thousands of animals with actual weaning weights recorded were evaluated with DNA. Some with very high weaning weights had the same gene markers in common, while some with poor weaning weights possessed an altogether different set of gene markers. We can now DNA test to investigate whether an animal outside the discovery group possess these favorable markers proven for superior weaning weight. The DNA possessed by a sire is directly correlated to his ability to transmit desirable traits to his offspring.

EPDs are good, DNA makes them better. EPDs work. They are the best information in the industry, but are inherently dynamic with something called "possible change", which says that EPDs can change significantly once progeny arrive. No fault of the system, because a pedigree prediction cannot describe which genes an animal actually got from its parents, as there are billions of possible combinations. When DNA for these favorable (or unfavorable) markers is applied to the calculation of EPDs for each trait, they become much more accurate. In fact, Zoetis HD 50K can make EPDs up to 6 times more accurate and predictable than a pedigree prediction alone.

	Genomic	Progeny
	Accuracy	Equivalents
CEB	0.39	23
BW	0.39	13
WW	0.3	14
YW	0.32	15
CEM	0.26	23
MILK	0.26	15
CW	0.27	11
MARB	0.25	10
REA	0.24	9
FAT	0.36	26
YG	0.25	11

Another way to look at it is with Progeny Equivalents. They describe how many progeny a bull would have to sire in order for his EPDs to reflect a comparable amount of accuracy:

Birth – BW EPD with 50K has the same accuracy as 13 progeny birth weights turned in on your bull.

Weaning – WW EPD with 50K has the same accuracy as 14 progeny weaning weights on your bull.

Yearling – YW EPD with 50K has the same accuracy as 15 progeny yearling weights on your bull.

Milk – M EPD with 50K has the same accuracy as having 15 daughters in production out of your bull.

Carcass – CW EPD with 50K has the same accuracy as 11 progeny carcasses weighed from your bull.

Rib Eye – RE EPD with 50K has the same accuracy as 9 progeny carcasses measured for Rib Eye.

Marbling – MB EPD with 50K has the same accuracy as having 10 progeny carcasses graded.

Ultrasound – Carcass EPDs with 50K have the same accuracy as up to 30 progeny scanned.

The Zoetis 50K DNA test analyzes over 50,000 different markers spread across the entire bovine genome for the most comprehensive analysis, unlike cheaper DNA tests that only look at 400 gene markers, and are obviously less accurate.

Today we can reliably put bulls together for uniformity as well or better with Genomic-Enhanced (GE) EPDs than we can with half-brothers or even full brothers with non GE EPDs.

For more information on Zoetis HD 50K DNA and Genomic-Enhanced EPDs visit zoetisanimalgenetics.com or call

BULL MORTALITY *and* LOSS OF USE INSURANCE

Insurance Coverage Underwritten By:

Aegis Security Insurance Company
PO Box 3153, Harrisburg, PA 17105-3153
A.M. Best Rating: A VI

Option 1: Bull Mortality and Loss of Use Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** One Year Policy Term
- Premium:** 12% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** All bulls must be tested, certified and listed in the official catalog of a herd sale.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Option 2: Bull Mortality Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** Renewable One-Year Policy Term for Bulls 6 Month - 7 Years of age.
- Premium:** 5.5% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** Veterinarian examination and signed statement of health required for all bulls for which coverage is requested.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 47 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is that there is a lot more to it than mating the right cows to the right bulls.

Developing bulls is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions.

Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to.

The program starts them on a high roughage diet (44 Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establishing a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 lbs. of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy.

After the initial receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 lbs ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 57-Mcal diet with performance target of 3.2 to 3.5 lbs. ADG—to bring the customer that high-performance, stylish bull that the Bieber brand is known for.

After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a "holding pattern" through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 47 years of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services 605/690-4974.

Black.

EPD Averages for Non Parents under Two years of Age

CED 4 / BW -1.0 / WW 56 / YW 83 / MILK 20 / TM 48 / ME 1 / HPG 10 / CEM 5 / STAY 11 / MARB .43 / REA .15

Bull Selection Simplified.

Building a cow herd?

- Combine low-expense traits (ME EPD) with acceptable revenue traits to breed efficiency into the cow herd.
- Improve fertility with selection pressure on HPG EPDs.
- Sleep through the night by selecting high-CEM EPDs.
- Improve longevity and lower replacement rates by selecting higher-than-average STAY EPDs.

Breeding virgin heifers?

- Select for CED EPD as the most meaningful predictor of calving ease. Red Angus' CED combines birthweight and other factors affecting calving-ease scores.

Selling calves or yearlings?

- Heavier payweights may be achieved by selecting higher WW EPDs, but...make sure heavier is what you want. Heavier weaning weights mean heavier payweights for calf feds. However, for those who background their calves, too much weaning weight could translate into yearlings that are too heavy when they enter the feed yard, and finish too heavy. **Overshooting performance goals can be just as detrimental as falling short.**
- Enhance your reputation - improve traits that impact feeder profits, such as carcass traits and post-weaning gain (YW).

Retaining Ownership?

- Docile and fast starting, Red Angus are easy to start on feed and keep on feed.
- Balance YW EPD of potential bulls with the existing cow herd to pinpoint needed improvement for post-weaning gains.
- Increase payweight with selection for improved CW EPD.

Selling on a Grid?

- Fine-tune marbling (MARB), rib eye area (REA), and back fat (FAT) EPDs to target value-based grids.
- Target YG 1 & 2 premiums and avoid YG 4 discounts by applying selection pressure on YG EPD.
- Optimize carcass weights to increase payweights while avoiding discounts for heavy weight carcasses.
- Balance Carcass EPDs against existing cow herd genetics:
 - Cowherds of higher continental influence may require additional selection pressure on marbling EPD to improve quality grade.
 - High-percentage British cowherds typically benefit from selection pressure to reduce YG and increase CW.

Ranch Tested. Rancher Trusted.

Roosevelt W384 is going to be a sire that is around our program for a long time. The sons are easy to look at and even easier to sell. His first daughters weaned calves last fall and they have done outstanding with great udders and an average WWR of 102. We didn't have a large group of daughters but we feel very confident that the future for Roosevelt maternally is strong. His leading son Rollin Deep has several sons this year as well and they will not disappoint even the most discriminating cattlemen. Roosevelt's data point to him as a Milk, TM, ME and Marbling leader. That data would point to him as a cowherd builder and that is right where we think he fits! Semen Available from Bieber Red Angus.

Rollin Deep Y118 has gotten a lot of attention with his first progeny this year. One of our partners Silver Spur had a pen of 3 all of which were Rollin Deep sons and they won Reserve Champion Pen of 3 Bulls at the NWSS in January. Silver Spur also had a daughter who has gotten a lot of favorable comments from show watchers. We have a limited number of sons and we will have a lot more next year. They are wide based and deep flanked. Rollin Deep will be a sire to watch this year. Semen will not be available until Jan 2015.

H Hughes is without a doubt our go to sire for calving ease. We didn't have many progeny last year but we made up for lost time this year with 87 sons tested. That is probably the most calves we have had in our program from any one sire ever. Hughes comes with great CE and low BW. We really think the daughters will be great cows.

The happiest people don't necessarily have the best of everything. They just make the best of everything.

Samurai X22 was produced by our cooperator and friend Gene Rouse and sold to Select Sires. For years we looked for a Cheyenne son we could tie into, and finally he showed up in our own offering, thanks to Gene. Samurai's first calves have all the blow and go that his data shows. They are stout and have great carcasses. Samurai has that Red Angus color that George Chiga indicated was the mark of leading herd sires in his time. Sons and daughters sell. Samurai semen is available through Select Sires on very limited basis due to an injury this past breeding season. Watch for more availability as we come into the spring.

We had the opportunity to purchase pasture rights on Epic R397 K at Milk Creek in the fall of 2012. Epic puts a number of measurable traits right in the sweet spot. His pedigree makes him an outcross for our customers. We need to give credit where credit is due, cooperators Gene Rouse and Dan Bormann turned us on to Epic and we are glad they did. Epic starts out the offering with lot 3, 4, and 5 and we really like the muscle, volume and growth we have seen in his sons.

Cyclone 9934W really caught our eye in 2011 at the Ludvigson Sale and Jon Marshall, TX, bought him. We talked to Jon about a possible lease on the bull and Cyclone has been used here naturally. He sired the high selling bull last year Bieber Stormer Z433 who sold to Bachman Red Angus, MO and Accelerated Genetics. This year's offering includes some pretty interesting ET sons out of Bieber Galee 9513 one of our premier growth donors. We really like the daughters sired by Cyclone and think he is going to be a very useful sire.

Takeover 9943W sold in Ludvigson's 2011 offering, and his kind and data impressed us. His first sons sold last spring and really turned some heads. His carcass puts him in pretty exclusive company with both Marbling and REA in the top 2% of the breed. Our thoughts are that Conquest x Packer is one of those synergistic matings that really produces progeny that are prepotent and offer lots of potential for profit. We are offering a very limited number of sons this year but we will have more in the future.

Hard Drive Y120 sold to Select Sires in 2013. When you study Hard Drive's data you are pretty hard pressed to find a sire that will posts as many traits in as high of percent rank as he does. We see Hard Drive going lower on BW so expect his progeny to be in high demand. We have a few sons this year but have mated Hard Drive much more intensively and expect a large group of progeny to be born this spring. Hard Drive semen is available through Select Sires.

Ron and Lois celebrated their 50th wedding anniversary in December.

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in north-west Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was

not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975, we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

"WE GIVE MULTIMIN® 90 AT BIRTH, BRANDING, BREEDING & ON ALL OF OUR BULLS"

Brock Kerr, DVM
Chad Kerr, DVM

Dodge City Veterinary Clinic
Dodge City, KS

Videos at YouTube
"Multimin USA" Channel

We AI using **MULTIMIN® 90** on customers' heifers to help synch their program and we're seeing a 10% to 15% increase (from 55% to 70%) with settling rates and that's a **BIG DEAL**. In our bull breed programs with first calf heifers, we're seeing 96% to 97% conception rates and second calf heifers a rate of 94%—again that's really good! Before **MULTIMIN® 90** we were only seeing an 82% rate. On the herd health side we've seen some really impressive results on calf sickness, mortality and morbidity. And in our stocker cattle, we're using a lot less antibiotics.

DON'T BREED WITHOUT IT!

KSU study data indicated that beef cows injected with **MULTIMIN® 90** at pregnancy diagnosis and again 30 days before start of breeding had:

Timed AI pregnancy rates

Body condition score gain between calving and breeding

Overall pregnancy rate

More compressed calving distribution

SHOULD YOU SPEND MORE OR LESS FOR A BULL?

Bull Purchase Price

Purchasing bulls is a critical management decision. The following table was developed assuming: annual bull maintenance costs of \$350 (operating costs plus a 10 percent risk of death loss), a 90 percent calf crop, and a salvage value of \$1,100. Several conclusions can be reached from this data:

Losing a bull in the first or second year is extremely costly on a per-calf basis and the loss overwhelms most of the genetic potential that might be derived from that sire's limited influence in the herd.

When possible, bulls should be servicing 25 or more females per season to allow the enterprise the flexibility to spend more on each bull purchased.

Determining the price to be spent on a bull depends on the marketing target and the bull's ability to generate an advantage in excess of the additional cost per calf as purchase price increases. For example, a bull purchased for \$3,000 and used in a 1:25 scenario for four years must contribute more than \$5.56 per calf across all four calf crops to warrant the additional price as compared to a \$2,500 bull.

The national sire evaluation system allows producers to make reasonable comparisons between bulls and groups of bulls by estimating expected progeny differences for traits such as weaning weight, yearling weight and carcass weight. These estimates can then be assigned economic value by applying market prices. Some breed associations are now providing additional index values that are reasonable estimates of composition traits such as carcass value, maternal merit and feedlot performance.

Reprinted with permission from Cattle-Fax

**Annual Bull Cost Per Weaned Calf
Years Bull Used:**

Purchase \$	1	2	3	4
\$2,000	102	43	24	14
\$2,500	124	54	31	19
\$3,000	147	66	39	25
\$3,500	169	77	46	31
\$4,000	\$191	\$88	\$53	\$36

* 25 cows per bull

We often get asked how much should we spend on a bull and the above article and commentary provide some insight to that question.

Many people tell us they can't afford to spend much on their bulls. This couldn't be further from the truth. The cost of running a good bull is the same cost as running a bad bull. A good bull will easily add 30-50 pounds to your average weaning weight. Even if the bull is only mated to 25 cows and you get a 95% calf crop and a modest \$1.50 per pound value, then the good bull will net \$1125 to \$1875 per year above an average bull. With an average useful life of 4 years and an equal residual sales price, you can pay \$4500 to \$7500 more for the good bull over an average bull without a loss of profitability. This is before you consider that current prices on weaned calves are above the prices listed, good bulls last longer on average, have better resale and are often mated to more than 25 cows. Most operations would improve their bottom line by breeding to higher quality bulls.

Comments from Bieber Red Angus Ranch:

This older data from Cattle-Fax points out that \$500 more on a bull means that the bull needs to contribute \$5.56 per calf across 4 calf crops to warrant the additional price. If you do the math on a 600lb calf at \$1.50, it only takes a little over 5 pounds per calf to break-even on the high priced bull. We have consistently found the real value of high priced bulls comes in added value to the heifers calves. Often this past fall and winter the difference between replacement quality heifers and average heifers was \$10 to \$15 dollars per hundred weight at the same auction on the same day. We have a customer that decided to support a breeder with a very short history and purchased two bulls. His bull battery contained three bulls from Bieber Red Angus Ranch and two from the young breeder. The herd runs with one bull per breeding pasture. This customer found out that the Bieber Red Angus Ranch bulls gave him an average 60lbs more per calf than the other breeder's bulls. This producer told us "I am tired of helping everyone else. From now on, I will be back to buy Bieber bulls to help myself. Your bulls are just bred better."

Just one more fact to support the case for better bulls. Land Grant Universities have often shown that being a "low cost" producer is a key to survival in the cow/calf business. Ironically, the same research has shown that buying good bulls is the only area where low cost producers spend more money than high cost producers.

The original reason we like the Cattle-Fax article was that we want our customers to understand what taking care of a young bull the first year, and every year after, is worth it. It can be very costly if one loses a bull in the first year. Bulls really should be separated from the cows to reduce competition for resources. They require some added care throughout the year to function like a fine-tuned athlete for your breeding season. We can't stress enough that the cost per calf weaned will significantly decrease if bulls have proper care during the off season, particularly in the first year.

Exceptional EPD's, Exceptional ratios, and exceptional pedigree. His

- Lot Number** - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in Lot number order.
- Name** - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam name.
- Born** - This is the birth date of the animal.
- Reg** - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org and going to the animal search page and using this registration number.
- Breed** - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR-Red Angus SM-Simmental XX=Unknown. The Unknown cattle are largely cattle that we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.
- Category**
 - 1A=100% Red Angus with no disqualifying features
 - 1B=87% to 99.9% Red Angus with no disqualifying features
 - II Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics
 - III=Less than 87% Angus blood content
 Disqualifying Features include scurs or horns, ineligible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date.
- Sire** - Sire of the animal
- Paternal Grand Sire** - Sire of the Sire
- Paternal Grand Dam** - Dam of the Sire
- Dam** - Dam of the animal
- Maternal Grand Sire** - Sire of the Dam
- Maternal Grand Dam** - Dam of the Dam
- MPPA** - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.
- AoD** - Age of Dam at the time of weaning the progeny identified.
- ADG** - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

- ADG Ratio** - Average Daily Gain Ratio -- The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.
- WDA** - Weight Per Day of Age -- Weight of an individual divided by days of age
- WDA Ratio** - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.
- AScr.** - Adjusted Scrotal Circumference--A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet 1 week prior to the sale and at the sale.
- Frame** - Frame Score -- A score based on hip height measurement adjusted to a yearling age. This score is related to slaughter weights and mature sizes.
- CE** - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree. *** = Use on heifers. Expect less calving difficulty. ** = Use on grower heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.
- Grw. Sc.** - Growth Score -- This is our recommendation for growth based upon the data and the pedigree. G 6 = maximum growth rating, G 5 = high growth rating, G 4 = moderately high growth rating, G 3 = average growth rating, G 2 = below average growth rating, G 1 = low growth rating.
- EPD** - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).
- acc** - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPD are a more reliable estimate of performance than weight, ratios or other measurements. Understanding ACCURACY. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported

- as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0 are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).
- %Rank** - This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and Opportunity Sires, Active Dams and Non Parent under Two Years of Age.
- Wis** - Weight--The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.
- Ratio** - Ratio--The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET a have no contemporary group.
- CED** - Calving Ease Direct - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.
- Birth Weight EPD** - predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.
- BW** - Birth Weight (BW) -- The actual weight in pounds at birth.
- Weaning Weight EPD** - predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.
- WW** - Weaning Weight-- The 205 adjusted weight. This is an indicator of growth up to weaning.
- Yearling Weight EPD** - predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.
- YW** - Yearling Weight -- The 365 adjusted weight. This is a measure of growth from birth to yearling.
- Milk EPD** (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.
- TM** - Total Maternal EPD - predicts the rancher's actual

- observation of weaning weights of calves raised by an animal's daughters. TM includes the daughter's milk EPD plus half of her genetic contribution to her calf's weaning weight EPD. The formula for TM EPD is: TM EPD = Milk EPD + 1/2 (WW EPD)
- ME** - Maintenance Energy - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to insure greater accuracy of this EPD.
- HPG** - Heifer Pregnancy - predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to insure the accuracy of this EPD.
- CEM** - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits/birth weight, calf shape, etc.) that make it more likely to be born unassisted.
- STAY** - Stayability (STAY) - predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.
- MARB** - Marbling Score- predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.
- REA** - Rib Eye Area - predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.
- FAT** - 12th Rib Fat Thickness - predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade. Fat thickness measured in young seedstock, maybe an indicator of fleshing ability.
- Footnote** - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 3 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.

Predicting Profit...

...The Ranchers Guide to EPDs

Cowherd Building Traits

Profit starts at Reproduction!

Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cow herd building traits.

Profitable reproduction can be boiled down to success in these four Economically Relevant Traits:

Calving Ease Direct (CED): The expected progeny difference of calves being born unassisted from two year-old heifers. The Red Angus CED model accounts for contemporary group birth weight differences and calving ease scores.

Heifer Pregnancy (HPG): The expected progeny difference of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): The expected progeny difference of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): The expected progeny difference of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to a higher rate of replacement females that the rancher can't cash crop.

Cows Eat Money! That's why Red Angus published the Mature Cow Maintenance Energy EPD (ME EPD), becoming the first beef breed to evaluate the expense side of the ranchers' profit equation. Here are the facts:

- ME predicts differences in maintenance energy requirements of mature daughters of a bull.
- Maintenance energy requirements are directly related to feed cost - often producers' largest single expense.
- The lower the ME EPD, the less feed daughters require to maintain body condition.
- ME can be used to ensure environmental fit, and to estimate additional feed required by increased growth & milk.

With a long standing commitment to better serve this continually changing beef industry, Red Angus has prepared for tomorrow's challenges through New & Improved Genetic Predictions (EPDs).

Red Angus has combined databases and subsequent EPD calculations with the American Simmental Association in order to simplify producers' use of crossbreeding programs by supplying them with true multi-breed EPDs. This enhancement enables Red Angus to provide reliable EPDs on all animals in the database, regardless of breed composition. Additionally, with the recent changes to carcass value Red Angus has added Carcass Weight and Yield Grade to its arsenal of ERTs.

EPDs are the most reliable predictors of an animal's true genetic merit. As the only major beef breed to mandate Total Herd Reporting (THR), Red Angus EPDs have the built in advantage of being calculated from 15 years of complete contemporary group data. EPDs have "fast-tracked" beef cattle improvement and removed much of the guesswork associated with selecting range bulls.
