Bieber Fever Turnout Sale!

Friday, June 1

at Hub City Livestock, Aberdeen, South Dakota

Progeny Sell from
these Sires in Volume

BIEBER HARD DRIVE Y120
Reg# 1436718

BIEBER SPARTACUS A193
Reg# 1617230

BIEBER ROLLIN DEEP Y118
Reg# 1436844

We are selling the last of our bull offering just in time for your breeding season. These bulls have plenty of shape, style, and muscle with the most progressive Red Angus genetics possible - and they will be semen tested and ready to turn out on sale day. If you're looking for consistency, quality, and exceptional potential, this offering has it all.

10
Two-Year-Old Red Angus Bulls

WELCOME TO THE SALE!

Cattlemen and Cattlewomen,

First of all, we want to thank each of you for taking the time to learn about our operation and take a deeper look at the cattle we have to offer.

For those of you who are new to Bieber Red Angus, here's a little bit about us. We are a family-owned business with roots in registered Red Angus cattle going back over 50 years. Each year, we calve over 900+ registered Red Angus, and wean over 225 ET calves. Our cow herd runs under range conditions typically requiring 10+ acres per cow/calf pair. Our ranch staff is dedicated to helping us produce profitable cattle, in a commercially orientated system. We consider them essential to the operation of the ranch, and value the input they share and time they put in, to make sure we excel at our goals.

We work hard to provide our customers with cutting edge genetics that excel in all segments of the beef industry. To us that means breeding for growth, fertility, calving ease, maternal and carcass traits. These traits should come in a functional package, with good feet, udders, and disposition, without giving up style and eye appeal. We truly believe through focused selection, you can have it all.

Because of this commitment, we are extremely proud of the bulls we produce. This offering is the result of our constant growth and improvement. We have increased our consistency and find that we have plenty of bulls to offer in a second sale. You can go to any sale and find good bulls at the front of the offering, but this Turnout Sale is impressive from start to finish. Every bull in the offering has plenty of shape, style, and muscle with the most progressive Red Angus genetics possible.

A potential buyer came to visit this Spring and couldn't help but remark, "You've got quite a program - I don't know how I'm going to choose." We take seriously the fact that buyers have all different price ranges, and we strive for bulls that are high quality for every buyer.

Our program depends highly on customer satisfaction. Repeat customers, long standing relationships, and real genetic value are what we strive to produce. Our priority has always been our personal alliance with you, our customer, and that will continue to be at the top of our list. We take great pride in the cattle we produce and we stand behind them. If there's a problem with any of the cattle you buy from us, we will always return your phone calls.

On sale day, we look forward to seeing our customers that have become friends and meeting new customers that we hope to have a long-standing relationship with. We are excited to see you at Hub City Livestock on June 1.

On Behalf of Bieber Red Angus

Craig J. Bieber

The sale is at Hub City Livestock in Aberdeen, SD.

THE PEOPLE OF BIEBER RED ANGUS

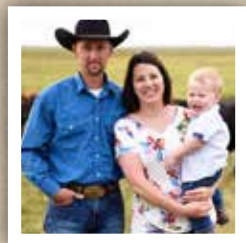

Ron Bieber: Founder of BRAR. Range, pasture and alfalfa specialist, and cattle breeding.

Lois Bieber: Co-Founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities.

Peggy Bieber: Craig's partner and full time office staff, handles all bookkeeping, cattle records, and clerks the sale.

Craig Howard: Cowboss. Handles day to day operations at BRAR. AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Cayson Howard: Son of Craig and Lindley Howard. Future ranch hand.

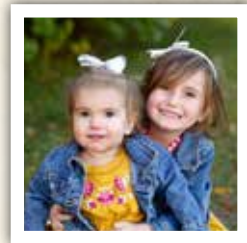

Dillon Spurr: Herdsman, calving, feeding, general ranch duties.

Megan Hove: Engaged to Dillon Spurr. Helps at brandings and the sale.

Eric Payne: Day help hand. Eric and Megan live in Aberdeen and he sells insurance.

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Loves to check cows with Grandpa and Grandma and daughter of Eric and Megan Payne.

Kylie Jo Payne: Daughter of Eric and Megan Payne. Works hard at keeping up with her big sister!

Kristin Harms: Moved back to the ranch and is working full time in the office.

Jake Harms: Herdsman and general ranch duties.

Hartley Lynn Harms: Daughter of Jake and Kristin Harms. The newest addition to the Ranch family!

Bieber Red Angus Interns:

We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year.

SCHEDULE OF EVENTS ACCOMMODATIONS

Thursday, May 31

Sale bulls will be transported to Hub City Livestock.

Lake View Motel (605) 284-2400 (Eureka)

DELIVERY POLICY:

Because of the late date of this sale, we will not be offering free delivery. All bulls will be taken to Hub City Livestock on Thursday, May 31. If the buyer cannot pick the bull up within one day of the sale, we will bring the animal back to our ranch for a \$25 charge and then begin charging \$3.50 per day for feed and yardage. We can assist in arranging delivery if needed.

HEALTH:

Ashley Vet Clinic, (701)288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. We have tested our replacement heifers for BVD since 2014 as part of our surveillance program and found no positive BVD carriers. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positives. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogryposis Multiplex(AM) (Curly Calf Syndrome), Neuropathic Hydrocephalus (NH) and any other known genetic defects. With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are not retaining any interest in the bulls in this sale. We are selling 100% interest and full possession.

BIRTH WEIGHTS/CALVING EASE:

We score for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull should be used on cows under standard conditions with little or no difficulty. This recommendation is a system we use to help our customers with calving ease selections.

Birth weights are highly affected by environmental factors. Research has indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures. The University of Nebraska conducted a three-year study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies comparing calves born in the southern US to calves born in the northern US. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD, BW EPD and Genomic data.

FEEDING:

Feeding arrangements are available on all yearling lots and will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up.

BREEDING SOUNDNESS EVALUATION:

Breeding soundness evaluations will be performed in late May prior to the sale. We will provide breeding soundness evaluation sheets for each bull when you pay for your purchases. We guarantee that all bulls are breeders. These bulls have passed a breeding soundness evaluation performed by Ashley Vet Clinic. Our guarantee will require that the bull weigh the same or more than when we did the breeding soundness evaluation in May 2018. We will do our best to make sure you are satisfied. Keep in mind that the development of any bull is inhibited by inadequate nutrition. If you have any questions regarding breeding soundness evaluations, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryo transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS:

All naturally born calves at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

SUPPLEMENT SHEET:

A supplement sheet will be available on sale day with any changes or updates to the data. Actual scrotals will be available on the supplement sheet on sale day or our website.

SALE INFORMATION

AIR TRANSPORTATION: Aberdeen is serviced by Delta Airlines. Watertown and Pierre are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING: We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis by watching on DV Auction and calling Hub City Livestock to bid. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself then the best option is to call Hub City Livestock. If we handle the bids for you, they will be done in the strictest of confidence.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, Auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day.

COLOR: All animals are red unless otherwise indicated in the footnotes.

GAIN TESTING: All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September 2017 and weighed in January 2018. The two-year-old bulls were weaned in October 2016 and gain tested with yearling weights in early May 2017.

SALE ORDER: The sale order will be catalog order.

COOPERATORS: In order to provide a better selection of cattle, we have partnered with the following people who have herds that are aligned with our own through genetics and management. We have listed their phone numbers as they represent the program and can help with your selection.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 49 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is there is a lot more to it than mating the right cows to the right bulls.

Developing bulls is 1/3 skill, 1/3 science and 1/3 art. If you feed too much, the cattle will get fat and will not hold up for our customers. If you feed too little, you can miss out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions.

Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to.

The program starts them on a high roughage diet (44-Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establish a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 pounds of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy.

After the initial receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three

weeks with a performance target of 2.25 to 2.7 pounds ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 57-Mcal diet with performance target of 3.2 to 3.5 pounds ADG. This allows us to bring the customer that high-performance, stylish bull that the Bieber brand is known for.

After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a "holding pattern" through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 49 years worth of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services (605)690-4974.

CHOOSE WISELY

Tom Field, PhD

For the commercial cow-calf producer the two most important professional relationships are with the seedstock supplier and the herd veterinarian. Genetics provides a foundation upon which the future of the enterprise will stand. The most influential genetic decisions made by a cow-calf producer who produces their own replacement heifers are the three most recent generations of herd sires. These bulls account for approximately 75 percent of the calf crop's genetic makeup in terms of their direct influence as sires of calves and as the sires of the cowherd. Given the tremendous influence of the bull battery, the sire acquisition process takes on a special level of significance and thus, the relationship with the genetic supplier becomes highly important.

One of my mentors in the cattle business believed that before a decision was made on which bulls to purchase, cattle producers should visit the potential seedstock suppliers business at least twice – initially to check out the supplier and secondly to evaluate the cattle. The concept was founded on a commitment to only buying seedstock from herds managed under a similar philosophy and with comparable weather, forage and climatic conditions to the purchaser's situation. His belief was that if the people were solid, then you could more confidently do business safe in the knowledge that they were creating good cattle and that they would stand behind them.

However, even before contact is made with a seedstock producer, the cow-calf manager must assess their own conditions, level of herd performance in critically important areas, and solidify their goals and objectives for the beef enterprise. Bull buyers who are making choices from an information rich perspective are more prepared to build a solid working relationship with a seedstock supplier. Determining the mating system is another key decision that should be determined by the cow-calf producer using knowledge about their own enterprise as well as leveraging the experience of other producers as well as the genetics supplier. The mating system as well as the sires selected to work within the mating system requires that commercial producers carefully assess four critical areas:

1. Feed resources and environmental limits
2. Labor resources
3. Marketing goals and objectives
4. Gaps between present and desired levels of performance in traits critical to profitability

Once these issues have been addressed in detail then a meaningful discussion can be undertaken with potential seedstock suppliers. A long term and valued relationship with a seedstock supplier(s) begins with business integrity, a commitment to providing solutions to customers, conversations founded on meaningful information, and service after the sale. As these discussions are undertaken, two concepts should always be

kept in mind – first, the novice bull buyer deserves an attentive supplier who is willing to provide education, answer questions, and most importantly follow up after the sale (Figure 2). Secondly, there is a dramatic difference between the supplier whose sole goal is to sell a bull and the supplier focused on solving problems for a customer.

Sire selection should be founded on making the most objective decision possible that is aligned with the overall strategy and vision for the cow-calf enterprise. Thus, it is essential to acquire bulls only from those herds with an active engagement in a performance program backed by a dynamic national data base and supported with state of the art genetic prediction tools. It is not important that a cow-calf producer understand the intricacies of how genetic estimates are calculated but developing a solid functional understanding of how to use the estimates and information is critical. The role of the seedstock supplier is to provide educational and consulting support to assure the comfort level of the customer.

The sire selection process is one driven by winnowing down the available bulls for sale into a group of individuals that possess the appropriate combination of performance metrics that align with the limitations of the resources available on the ranch and assure conformance to the demands of the target market for progeny. This narrowing down process can be driven by several key focal points:

1. Avoid sires that create dystocia. Calving difficulty is a leading cause of both calf and breeding female death loss, contributes to increased morbidity of calves born in difficult births, and diminishing subsequent reproductive rates of females experiencing dystocia.
2. Will replacement females be kept from the progeny – if yes, then what is the appropriate level of mature size and milk production for the particular farm or ranch? Attaining profitable levels of reproductive performance depends on the keeping the nutritional needs of the herd aligned with cost effective feed sources which are often in the form of grazable forages.
3. What is the optimal combination of growth, muscularity, marbling and carcass yield for the target market? Producing feeder calves that can be merchandised to generate high levels of revenue is fundamental to profitability.
4. Finally, what are the gaps in performance for the herd that need to be closed to improve productivity, profitability and quality of life? For example, if cattle are flighty and nervous in handling situation then more focus on docility is warranted. If udders are badly structured leading to calves unable to suckle and thus requiring more labor, then udder quality will need to be addressed.

In each of these discussions, the reputable seedstock breeder will provide information, insight and advice. Using their experience and knowledge is critical to building a genetic base designed for long term satisfaction from the cow-calf enterprise.

A WORD ABOUT GENOMICS

Information versus Data: making sense of what genomics provide us

"I am not buying my kid an encyclopedia. He can walk to school like I did." Lawrence "Yogi" Berra

It is a natural impulse for us to throw up our hand in frustration when challenged to make sense of waves of new information. There is no one equal to Yogi in the ability to express a kernel of wisdom in his malapropisms. In our particular world what he said would sound something like, "I'm going to pick the bulls that look the part to me and the hell with all the number!" Besides, it seems to be easy for a lot of people in our business to believe the numbers are a crock, a contrivance of an in-group to manipulate the process to their advantage. Our view is that the "numbers", the EPDs have been invaluable, will continue to be so, and that is not all that complicated.

The HD50K produces data that verifies parentage and predicts the breeding value of an individual bull for 19 different traits. Angus Genetic, Inc. (AGI) then processes that genomic data and puts it into a usable information format by updating and reporting genomically-enhanced EPDs (GE-EPDs) weekly.

The value of the genomic information is in improving the accuracy of the EPDs. The improve accuracy, according to the statisticians, of GE-EPDs can be expressed in the number of progeny records that would be required to produce equally valid phenotypically derived EPD values. Zoetis says the value of CED, for example, can change by as much as plus or minus 3 in a GE-EPD and that genomic data contributes

an equivalent amount of information about unassisted deliveries as would be derived from 21 offspring of a given bull.

To sum up, let us revisit the data versus information idea. Investigation of the genome and accumulation of data to predict outcome will continue across the entire spectrum of biology. No one can stop it. There is nothing fundamentally wrong or threatening with the process. At the same time, we believe that the interpretation of such data in our business is less than ideal, its impact sometimes exaggerated. In other words, the translation of data to usable information, actionable intelligence, in a work in progress. We believe that process will evolve and improve, particularly as more data accumulates.

Nothing in this world is perfect, including the tools we have to predict outcomes in the vast, magnificent world of biology. But EPDs are still, and will remain, the selection tools to use in choosing bulls to buy. They account for all sources of information on the individual, including pedigree, with collateral relatives' performance, individual performance, and genomic testing. They are the best tools we have and most definitely have worked for us.

Dan Borgen and Brian McCulloh

At Bieber Red Angus, we are convinced that Genomic data makes our EPDs more reliable. The majority of the bulls in this sale have been I50K tested.

Tom Bradbury of Bradbury Land and Cattle in Colorado offered us interest in this bull during the summer of 2015 and we jumped at the opportunity. We liked what the bull offered when he sold originally. His dam is an outstanding Red Angus female with a 105 MPPA, a BW ratio average of 91, and a WW ratio average of 105. Stockman's WW and YW growth is in the top 3% and 4%. His progeny have great shape and are very easy to like and notice - which is why we were not surprised when his first AI sire group of sons moved to the top end of the bulls during testing. Several of these sons are going to be strong candidates to replace him, but we are continuing to sample his progeny. Take a look on sale day, and we are sure that you will agree with our opinion of this bull.

Rollin Deep has been one of those rare sires that truly elevates the breed. He came along in 2012 and was an impressive individual from the start, posting outstanding data with one of the deepest phenotypes we had ever seen. We used him on a limited basis initially since his sire was continuing to produce very notable offspring. Eventually, his first progeny proved impressive and we started mating him heavily. Our customers found that his sons complimented both our program and their own with added muscle, great data, and superior style. Our attention then turned towards his daughters who continue to do an outstanding job. Rollin Deep has become the epitome of our program with 120 daughters in the herd and over 1200 progeny registered with the RAA. His influence has been felt across the breed and we have several great sons that are now making their own mark on the industry. We have a limited amount of semen available and will continue to produce progeny - but we are convinced his sons are going to be even better sires in our herd.

Deep End combines the aforementioned Rollin Deep with the great Laura 158W cow, who is also the dam of Hard Drive Y120. His data puts him at the top of the breed in several traits including WW and YW. Deep End's data will put his progeny in a very good position for profit and we are convinced this sire could replace his sire with even better carcass data. We expect to see a lot of his progeny in the coming year and he is likely to have a strong influence across the breed. He is in Genex's lineup with semen available from them.

Let's Roll is one of our leading choices to replace Rollin Deep with his outstanding dam, Basin Primrose 2043. He has been getting a lot of attention and we sampled him heavily during our 2017 breeding season for a large calf crop in 2018. Let's Roll's data makes him a go to bull with even more carcass, and the maternal traits we have seen from his dam, half-sisters and progeny are very desirable. We really do believe that with disciplined selection and breeding you can have it all, and Let's Roll is a prime example of that.

Spartacus was our leading sire in 2016 and 2017, and he will continue to be in 2018. We saw a drop in CED on Spartacus with the new data. We often see moves like this when we have an influx of progeny. When we take a closer look, we find that the average Red Angus sire needs calving assistance on 6% to 7% of progeny born out of heifers. With Spartacus, the data was a bit higher than the average, meaning you would provide calving assistance to around 11% of his progeny. Sometimes to get the strong growth and power we see out of his calves, you have to give a little on calving ease. In the big picture, we think Spartacus is a complete bull that will leave any breeding program in a very good position going forward. He is a great sire for us and many of our customers, and his daughters are going to be some of the best females we have in our herd. Semen is available through Select Sires or Accelerated Genetics.

Gladiator is a son out of Spartacus and Laura 158W, the dam of Hard Drive Y120. We have used three sons out of Laura 158W and we are convinced they will continue to move our genetics and our customers' genetics towards profitability. Gladiator has very desirable carcass and, along with the other sons of Hard Drive and Spartacus, we think he is going to hit it out of the park. Semen is available through Bieber Red Angus.

Hard Drive has been the pinnacle of our program the past few years and with good reason. His data hits a lot of the sweet spots across the board and his daughters are quickly becoming some of the best we have. We often get visitors that marvel at his daughters and how moderate they are. Our cowherd in general is much more moderate than many think. We have always tried to keep mature size in check and we feel that Hard Drive and Rollin Deep, along with their progeny, do a great job of that. Hard Drive is a very impressive sire all around. Semen is very limited across the country.

Federalist B543 is a calving ease sire with great maternal strength and he will definitely stack marbling in his progeny. The Primrose cowline has a great reputation for marbling and maternal. We've found that they also consistently offer calving ease but keep BW high enough so calves have some mass to withstand the bitter cold weather we can see in the northern plains. Semen is available through Genex.

Endurance was purchased by Caleb Acciacca of Acciacca Cattle, where he's been used as a cleanup bull. We really like his daughters and the fact that he still hangs in there competitively on data as a 6-year-old bull.

Forefront B281 was a pet as a calf and ended up being purchased by Cory with Wagonhound Livestock in 2015. We were flushing his dam, Laura 112W, and decided that we should get him collected and bring him back into the program. In the meantime, Tate Pieper liked him and bought him from Cory. Forefront offers calving ease deluxe with a great set of carcass data. Pieper's data did not get in before the cutoff this year, so we feel confident he is better on growth than his data shows right now. His progeny will likely be some of the best maternal cattle you will find. Semen is available through Bieber Red Angus.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale and would like to buy cattle, call Craig (605)439-3628 / (605)216-8169 / (605)439-3545) before the sale. Tell us what you are looking for and we will assist in arrangements to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 3 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.

2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.

3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place.

4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.

5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.
