WELCOME TO THE SALE!

Cattlemen and Cattlewomen,

First of all, we want to thank each of you for taking the time to learn about our operation and take a deeper look at the cattle we have to offer.

For those of you who are new to Bieber Red Angus, here's a little bit about us. We are a family-owned business with roots in registered Red Angus cattle going back over 50 years. Each year, we calve over 900+ registered Red Angus, and wean over 225 ET calves. Our cow herd runs under range conditions typically requiring 10+ acres per cow/calf pair. Our ranch staff is dedicated to helping us produce profitable cattle, in a commercially orientated system. We consider them essential to the operation of the ranch, and value the input they share and time they put in, to make sure we excel at our goals.

We work hard to provide our customers with cutting edge genetics that excel in all segments of the beef industry. To us that means breeding for growth, fertility, calving ease, maternal and carcass traits. These traits should come in a functional package, with good feet, udders, and disposition, without giving up style and eye appeal. We truly believe through focused selection, you can have it all.

Because of this commitment, we are extremely proud of these bulls. This offering is the best we have ever produced - not because of the top end, but because of the bottom end. You can go to any sale and find good bulls at the front of the offering. The difference comes when you get 350 bulls in and still see consistent quality. When you come to the ranch, make sure to look at all of the lots. We are sure you will appreciate the consistency throughout as much as we do. Every bull in the offering has plenty of shape, style, and muscle with the most progressive Red Angus genetics possible.

A potential buyer came to visit the day before we wrote this letter. As we were looking at the last 20 bulls in the offering, he couldn't help but remark, "You've got quite a program - I don't know how I'm going to choose." We take seriously the fact that buyers have all different price ranges, and we strive for bulls that are high quality for every buyer.

Our program depends highly on customer satisfaction. Repeat customers, long standing relationships, and real genetic value are what we strive to produce. Our priority has always been our personal alliance with you, our customer, and that will continue to be at the top of our list. We take great pride in the cattle we produce and we stand behind them. If there's a problem with any of the cattle you buy from us, we will always return your phone calls. We'll do whatever we can to ensure you're satisfied. In fact, if you come show us this line on March 1 prior to the start of the sale, you get a free cap to show our appreciation!

On sale day, we look forward to seeing our customers that have become friends and meeting new customers that we hope to have a long-standing relationship with. We are excited to see you at BIEBER FEVER VIX on March 1.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 49 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is there is a lot more to it than mating the right cows to the right bulls.

Developing bulls is 1/3 skill, 1/3 science and 1/3 art. If you feed too much, the cattle will get fat and will not hold up for our customers. If you feed too little, you can miss out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions.

Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to.

The program starts them on a high roughage diet (44-Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establish a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 pounds of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy.

After the initial receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 pounds ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 57-Mcal diet with performance target of 3.2 to 3.5 pounds ADG. This allows us to bring the customer that high-performance, stylish bull that the Bieber brand is known for.

After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a "holding pattern" through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 49 years worth of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services (605)690-4974.

Better genetics are being rewarded in marketplaces all over this nation. Choosing great genetics from herds associated with Allied Genetic Resources puts you the position to take advantages of these opportunities and so many more as we look toward the future. The Allied logo stands for quality, it stands for commitment to the future and it means that you can expect the very best in customer services, year after year. There is no room in the future of the beef business for average genetics and no producer should settle for less than profit improvement with each new set of bulls and each new generation.

Once you have made the choice to use genetics backed by the industry leading herds using the Allied logo, take the next step and look to Allied for services. Our growing list of feeder cattle marketing specialists are there to help produce more dollars for loads of calves that deserve them. Our consulting services too are available as you navigate a world with ever more advanced genetic tools for selection and progress. Regardless of your specific needs, when it comes to genetics for the future, we simply offer more. This year our members will market nearly 9000 commercially focused bulls, all from the 29 states that they call home. The Allied program is backed by a national presence, but is based on a locally produced and serviced product from the very best and most experienced group of independent seedstock producers. Contact any one of our service oriented staff to learn more about the value proposition offered by Allied and the producers that own it.

MAKE BULL BUYING EASY

No cost genetic procurement is one of the great services offered by our team of experienced representatives. Call today for more details and a simpler 2018.

THE PEOPLE OF BIEBER RED ANGUS

Ron Bieber: Founder of BRAR. Range, pasture and alfalfa specialist, and cattle breeding.

Lois Bieber: Co-Founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

Dalen Stahl: Handles machinery maintenance, mechanics, and night calving relief.

Rachel Pickell: Head Rockpicker and water tank cleaner. Helps us out on weekends and whenever there isn't school.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities.

Peggy Bieber: Craig's partner and full time office staff, handles all bookkeeping, cattle records, and clerks the sale.

Jared Schaefer: Night calver and day help.

Craig Howard: Cowboss. Handles day to day operations at BRAR. AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer

intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Cayson Howard: Son of Craig and Lindley Howard. Future ranch hand.

Eric Payne: Day help hand. Eric and Megan live in Aberdeen and he sells insurance.

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Loves to check cows with Grandpa and Grandma and daughter of Eric and Megan Payne.

Kylie Jo Payne: Daughter of Eric and Megan Payne. Works hard at keeping up with her big sister!

Tom Churchwell: General ranch duties, light mechanics, handles all cattle feeding.

Frankie Churchwell: Wife of Tom Churchwell. Keeps the guys happy with her caramel rolls. Helps at sale.

Kristin Harms: Moved back to the ranch and is working full time in the office. Will give us our newest granddaughter any day now!

Jake Harms: Herdsman and general ranch duties. Soon to be father of our newest granddaughter!

Dillon Spurr: Herdsman, calving, feeding, general ranch duties.

Megan Hove: Engaged to Dillon Spurr. Helps at brandings and the sale.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year.

DELIVERY POLICY:

We offer free delivery on all purchases of individual lots over \$3500 per head to central points in surrounding states. Volume purchases by one buyer of five head or more, that average over \$3500 per head, will be delivered free to central points in the US. All purchases under \$3500 per head will be delivered at cost. Central points for delivery include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition. All commercial heifer lots will be delivered at cost. We will help you with arrangements on commercial lots.

HEALTH:

Ashley Vet Clinic, (701)288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. We have tested our replacement heifers for BVD since 2014 as part of our surveillance program and found no positive BVD carriers. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positives. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogyrosis Multiplex(AM) (Curly Calf Syndrome), Neuropathic Hydrocephalus (NH) and any other known genetic defects. With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 50% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch's interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE:

We score for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard

conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull should be used on cows under standard conditions with little or no difficulty. This recommendation is a system we use to help our customers with calving ease selections.

Birth weights are highly affected by environmental factors. Research has indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures. The University of Nebraska conducted a three-year study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies comparing calves born in the southern US to calves born in the northern US. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD, BW EPD and Genomic data.

FEEDING:

Feeding arrangements are available on all yearling lots and will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding soundness screenings will be performed in February before the sale. We fully guarantee that these bulls will pass the breeding soundness evaluation before the breeding season in 2018 if the bulls are managed properly. Part of being maintained properly means being on a plan of nutrition where bulls maintain or gain weight. The bulls will be weighed the week prior to the sale when the breeding soundness evaluation is done. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. Our guarantee will require that the bull weigh the same or more than when we did the breeding soundness evaluation in February 2018. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reasons. We will do our best to make sure you are satisfied. Keep in mind that the development of any bull is inhibited by inadequate nutrition. If you have any questions regarding breeding soundness evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryo transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS:

All naturally born calves at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day. Please see information in catalog.

SALE INFORMATION

AIR TRANSPORTATION: Aberdeen is serviced by Delta Airlines. Watertown and Pierre are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING: We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have one phone line available and can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAuction below.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, Auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR: All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE: Everyone is invited to dinner at Ron and Lois's after the sale. We will be serving strip loin cooked by our friend Stu Campbell.

UPDATED INFORMATION, YEARLING WEIGHTS, AND ULTRASOUND DATA:

All yearling bulls will be ultrasounded, and updated carcass EPD information will be available the week before the sale. Yearling adjusted scrotal size is printed in the catalog and actual scrotal measurements will be available the week of the sale. The scrotal measurement in the catalog on all yearling bulls is adjusted by the Red Angus Association of America. We find actual scrotal measurements at sale time are typically 1 centimeter larger than the adjusted measurements. All other data not provided will be available upon request.

GAIN TESTING: All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September and weighed off in January.

INFORMATION: Supplement sheets will be available in February on the website or upon request. Supplement sheets will include actual scrotal measurements, actual weights and updated carcass EPDs.

SALE ORDER: The sale order will be catalog order.

COOPERATORS: In order to provide a better selection of cattle, we have partnered with the following people who have herds that are aligned with our own through genetics and management. We have listed their phone numbers as they represent the program and can help with your selection.

Gene Rouse (ROU)	(515) 231-9129	Huxley, IA	Red Angus
Dan Bormann (ROU)	(515) 520-7707	Huxley, IA	Red Angus
Caleb Acciacca (ACC)	(906) 395-7377	Baraga, MI	Red Angus

DVAuction **Broadcasting Real-Time Auctions**

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction website at www.dvauction.com or call (402) 474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale. After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your online purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at (402) 474-5557 or e-mail support@dvauction.com. We recommend that you register by February 28, 2018 for online bidding. Every attempt will be made to complete your application even if it is on sale day.

CHOOSE WISELY

Tom Field, PhD

For the commercial cow-calf producer the two most important professional relationships are with the seedstock supplier and the herd veterinarian. Genetics provides a foundation upon which the future of the enterprise will stand. The most influential genetic decisions made by a cow-calf producer who produces their own replacement heifers are the three most recent generations of herd sires. These bulls account for approximately 75 percent of the calf crop's genetic makeup in terms of their direct influence as sires of calves and as the sires of the cowherd. Given the tremendous influence of the bull battery, the sire acquisition process takes on a special level of significance and thus, the relationship with the genetic supplier becomes highly important.

One of my mentors in the cattle business believed that before a decision was made on which bulls to purchase, cattle producers should visit the potential seedstock suppliers business at least twice – initially to check out the supplier and secondly to evaluate the cattle. The concept was founded on a commitment to only buying seedstock from herds managed under a similar philosophy and with comparable weather, forage and climatic conditions to the purchaser's situation. His belief was that if the people were solid, then you could more confidently do business safe in the knowledge that they were creating good cattle and that they would stand behind them.

However, even before contact is made with a seedstock producer, the cow-calf manager must assess their own conditions, level of herd performance in critically important areas, and solidify their goals and objectives for the beef enterprise. Bull buyers who are making choices from an information rich perspective are more prepared to build a solid working relationship with a seedstock supplier. Determining the mating system is another key decision that should be determined by the cow-calf producer using knowledge about their own enterprise as well as leveraging the experience of other producers as well as the genetics supplier. The mating system as well as the sires selected to work within the mating system requires that commercial producers carefully assess four critical areas:

1. Feed resources and environmental limits
2. Labor resources
3. Marketing goals and objectives
4. Gaps between present and desired levels of performance in traits critical to profitability

Once these issues have been addressed in detail then a meaningful discussion can be undertaken with potential seedstock suppliers. A long term and valued relationship with a seedstock supplier(s) begins with business integrity, a commitment to providing solutions to customers, conversations founded on meaningful information, and service after the sale. As these discussions are undertaken, two concepts should always be

kept in mind – first, the novice bull buyer deserves an attentive supplier who is willing to provide education, answer questions, and most of importantly follow up after the sale (Figure 2). Secondly, there is a dramatic difference between the supplier whose sole goal is to sell a bull and the supplier focused on solving problems for a customer.

Sire selection should be founded on making the most objective decision possible that is aligned with the overall strategy and vision for the cow-calf enterprise. Thus, it is essential to acquire bulls only from those herds with an active engagement in a performance program backed by a dynamic national data base and supported with state of the art genetic prediction tools. It is not important that a cow-calf producer understand the intricacies of how genetic estimates are calculated but developing a solid functional understanding of how to use the estimates and information is critical. The role of the seedstock supplier is to provide educational and consulting support to assure the comfort level of the customer.

The sire selection process is one driven by winnowing down the available bulls for sale into a group of individuals that possess the appropriate combination of performance metrics that align with the limitations of the resources available on the ranch and assure conformance to the demands of the target market for progeny. This narrowing down process can be driven by several key focal points:

1. Avoid sires that create dystocia. Calving difficulty is a leading cause of both calf and breeding female death loss, contributes to increased morbidity of calves born in difficult births, and diminishing subsequent reproductive rates of females experiencing dystocia.
2. Will replacement females be kept from the progeny – if yes, then what is the appropriate level of mature size and milk production for the particular farm or ranch? Attaining profitable levels of reproductive performance depends on the keeping the nutritional needs of the herd aligned with cost effective feed sources which are often in the form of grazable forages.
3. What is the optimal combination of growth, muscularity, marbling and carcass yield for the target market? Producing feeder calves that can be merchandised to generate high levels of revenue is fundamental to profitability.
4. Finally, what are the gaps in performance for the herd that need to be closed to improve productivity, profitability and quality of life? For example, if cattle are flighty and nervous in handling situation then more focus on docility is warranted. If udders are badly structured leading to calves unable to suckle and thus requiring more labor, then udder quality will need to be addressed.

In each of these discussions, the reputable seedstock breeder will provide information, insight and advice. Using their experience and knowledge is critical to building a genetic base designed for long term satisfaction from the cow-calf enterprise.

A WORD ABOUT GENOMICS

Information versus Data: making sense of what genomics provide us

"I am not buying my kid an encyclopedia. He can walk to school like I did." Lawrence "Yogi" Berra

It is a natural impulse for us to throw up our hand in frustration when challenged to make sense of waves of new information. There is no one equal to Yogi in the ability to express a kernel of wisdom in his malapropisms. I our particular world what he said would sound something like, "I'm going to pick the bulls that look the part to me and the hell with all the number!" Besides, it seems to be easy for a lot of people in our business to believe the numbers are a crock, a contrivance of an in-group to manipulate the process to their advantage. Our view is that the "numbers", the EPDs have been invaluable, will continue to be so, and that is not all that complicated.

The HD50K produces data that verifies parentage and predicts the breeding value of an individual bull for 19 different traits. Angus Genetic, Inc. (AGI) then processes that genomic data and puts it into a usable information format by updating and reporting genomically-enhanced EPDs (GE-EPDs) weekly.

The value of the genomic information is in improving the accuracy of the EPDs. The improve accuracy, according to the statisticians, of GE-EPDs can be expressed in the number of progeny records that would be required to produce equally valid phenotypically derived EPD values. Zoetis says the value of CED, for example, can change by as much as plus or minus 3 in a GE-EPD and that genomic data contributes

an equivalent amount of information about unassisted deliveries as would be derived from 21 offspring of a given bull.

To sum up, let us revisit the data versus information idea. Investigation of the genome and accumulation of data to predict outcome will continue across the entire spectrum of biology. No one can stop it. There is nothing fundamentally wrong or threatening with the process. At the same time, we believe that the interpretation of such data in our business is less than ideal, its impact sometimes exaggerated. In other works, the translation of data to usable information, actionable intelligence, in a work in progress. We believe that process will evolve and improve, particularly as more data accumulates.

Nothing in this world is perfect, including the tools we have to predict outcomes in the vast, magnificent world of biology. But EPDs are still, and will remain, the selection tools to use in choosing bulls to buy. They account for all sources of information on the individual, including pedigree, with collateral relatives' performance, individual performance, and genomic testing. They are the best tools we have and most definitely have worked for us.

Dan Borgen and Brian McCulloh

At Bieber Red Angus, we are convinced that Genomic data makes our EPDs more reliable. The majority of the bulls in this sale have been ISOK tested.

Lot 1

We are starting the sale with three Spartacus sons that may be some of the best bulls we have ever produced. This first bull combines his sire with Rollin Deep genetics on the dam side. The Rollin Deep daughters have exceeded our expectations as they are great cows with very good udders and maternal traits. The stout phenotype they produce makes them an excellent mating with Spartacus. Lot 1 also boasts the great Primrose cowline. His granddam was flushed extensively and has over 50 progeny registered, and we fully expect that 512B will be in our flush program in 2018 and 2019. Spartacus has been our go to sire for the last few years, and he made a lot of friends last fall when he was on display at our production sale - you won't find a sire with a better disposition. Don't think for a minute we have forgotten the females with this bull! We will continue to talk about it throughout the catalog, but we find that the Spartacus daughters are outstanding. Our goal has always been to produce Red Angus cattle that are useful for the industry and will produce consistent results. Casey Fanta of Wulf Cattle commented to us that our genetics are very consistent and that fits their program and end goal extremely well.

Lot 2

This is a bull that is just about as thick as he is deep. Lot 2 has been a standout since day one. He comes from an exceptional dam who we flushed in our program early. In hindsight, we wish we would have flushed his granddam, because we flushed her great granddam extensively with excellent results. The granddam Basin Eldorene has 33 progeny registered to her credit. She is now in 9 Mile Ranch's ET program. We believe the best way to make them better is to continue using the young, consistent genetics, and Lot 2's dam is exactly the kind of cow that will move a program forward. She ranks high on our list of Fusion daughters, who have spectacular udders. Stacking his dam with Spartacus makes this bull one to watch in the future. His picture reminds us of Rollin Deep's phenotype - deep and thick with lots of style.

Lot 3

Our Iron Ore daughters have been a great add to our herd. Lot 3's dam is right at the top of that list, as this is her second son near the top of one of our bull offerings. Her first son sold to Cooksley Red Angus in Nebraska in our 2016 spring production sale. This Spartacus son shows more shape over the top than any other Red Angus bull you will find in the breed this season.

Lot 4

This Forefront son is the first 1B bull to sell. Through the years, we have found the Durham cowlines to offer a lot of performance and carcass, a fact which is easily explained by the 7 GridMaster awards they received from the Red Angus Association. Lot 4's dam is a Jericho daughter with a son that sold to our good friends and customers, Larry and Paulette Olson of South Dakota. His dam sold to George and Barb Cooksley of Nebraska last fall and will continue to make more outstanding progeny. Lot 4 is going to produce some very profitable cattle, on both the feeder cattle side and the maternal side.

Lot 6

Our son, Eric earned this lot's granddam in 2006 at the Oates Dispersal Sale. She came from a cow that Jim Shirm purchased five generations back to build his program. Lot 6's dam is a great cow and we worked out an agreement with Eric to flush her. Her sons and daughters are going to catch a lot of looks over the next couple of years, but this one is about as good as you can make them. Lot 6 is powerful, long and carries his thickness down deep. His hip height alone will get most to take a second look - he gets that from his powerful dam. Lot 6 has brothers selling as lots 22, 47, 144, 182, and 183.

Stockman was our pick of the Pieper bulls in 2015 and although we were the runner up bidder, Tom Bradbury offered us the opportunity to buy in later. This is the first sizable group of calves we have seen out of him and they do a lot of things right. Lot 7's two-year-old dam is likely headed for our ET program, just like her dam and granddam. His granddam has eight progeny in the herd, two natural and six out of our ET program. We really like our Iron Ore daughters and if they keep producing progeny like this lot, you will see a lot of them in the future. Lot 7's picture shows you how well made he is, and we think you would come to the same conclusion seeing him in person.

This outstanding heifer bull prospect stacks the Primrose cowline on both sides of the pedigree. Genex and Twedt Red Angus bought Federalist in 2015, and he has proven to be excellent on calving ease. Lot 11 combines the dimensions of Rollin Deep with these traits. This lot's calving ease is easy to see in his shape and through his pedigree.

Lot 19 is out of a sire that we sold to Mark Gross of SD in 2010 and then purchased back in 2015. He was one of the best Mission Statement sons we've seen, and since Mission Statement has more daughters in our ET program than any other sire, we decided we needed him back. Mick W190 has been a high libido sire with data that doesn't take a backseat to any of the rest.

One of the foundations of George Chiga's philosophy was that if you linebreed the good ones, the best will come to the top and you will have more prepotent genetics. Lot 23 is the epitome of linebreeding, with maternal half-brothers as the sire and the maternal sire. It worked well here.

The dam Primrose 196Y was lost in an unfortunate accident last year, and this will be her last natural calf. We did flush her and expect that she will have further impact down the road in our ET program. We think this could be one of her best sons to date and is definitely a Hard Drive son to take a look at.

Lot 25

Lot 25 is going to get a lot of attention on sale day for several reasons. First of all, he really holds his own on phenotype and is very impressive visually. Second, he is a Hard Drive son and a maternal sib to Rollin Deep. It's pretty difficult to stack a pedigree that is that well known. Third, he performed as well as any of them with a 3.5 ADG. It doesn't take much to know that lot 25 could be destined for greatness.

This Stockman son is almost as easy to find in the pen as he is to find on paper. He has some of the best carcass data in the offering, not to mention he is in the top 1% for HerdBuilder. His dam is out of the coveted Adelle cowline and is a product of our ET program. She is likely headed to the donor pen herself. This cowline has a long history of producing sons that go to studs and demanding commercial cattlemen. Make sure you take a look at this lot as he will likely be one we will sample down the road.

This bull is black and therefore a Category II.

Craig Bieber View on Life

Life's journey is not to arrive at the grave safely in a well preserved body, but rather to skid in sideways, totally worn out, and shouting "Holy cow...what a ride!"

Red Angus Returns

Calf enrollments in FCCP have increased
39% from 2015-2017 for the right reasons:

- Significant premiums
- Source verification for export markets
- Access to Angus product lines

Enrollees must verify:

- Traceability to at least 50 percent Red Angus breed influence
- Ranch of origin
- Group age

To enroll your calves and start earning industry-leading premiums, contact Chessie Mitchell, 940-387-3502, Ext. 2. Visit RedAngus.org for more information.

Ranch Tested. Rancher Trusted.

Red Angus

- Custom Semen Collection
- Advanced Laboratory Equipment
- CSS Approved Facility
- Semen Collection
- Domestic and International
- Completely Remodeled Facilities
- Online Inventory tracking
- Custom Shipping available
- AI Supplies/Liquid Nitrogen

We are offering FREE storage until June 1, 2018

This is a great opportunity to bring your inventory closer to home. Give the office a call and we will help you make arrangements to get your semen transferred.

Tom Bradbury of Bradbury Land and Cattle in Colorado offered us interest in this bull during the summer of 2015 and we jumped at the opportunity. We liked what the bull offered when he sold originally. His dam is an outstanding Red Angus female with a 105 MPPA, a BW ratio average of 91, and a WW ratio average of 105. Stockman's WW and YW growth is in the top 3% and 4%. His progeny have great shape and are very easy to like and notice - which is why we were not surprised when his first AI sire group of sons moved to the top end of the bulls during testing. Several of these sons are going to be strong candidates to replace him, but we are continuing to sample his progeny. Take a look on sale day, and we are sure that you will agree with our opinion of this bull.

Rollin Deep has been one of those rare sires that truly elevates the breed. He came along in 2012 and was an impressive individual from the start, posting outstanding data with one of the deepest phenotypes we had ever seen. We used him on a limited basis initially since his sire was continuing to produce very notable offspring. Eventually, his first progeny proved impressive and we started mating him heavily. Our customers found that his sons complimented both our program and their own with added muscle, great data, and superior style. Our attention then turned towards his daughters who continue to do an outstanding job. Rollin Deep has become the epitome of our program with 120 daughters in the herd and over 1200 progeny registered with the RAA. His influence has been felt across the breed and we have several great sons that are now making their own mark on the industry. We have a limited amount of semen available and will continue to produce progeny - but we are convinced his sons are going to be even better sires in our herd.

Deep End combines the aforementioned Rollin Deep with the great Laura 158W cow, who is also the dam of Hard Drive Y120. His data puts him at the top of the breed in several traits including WW and YW. Deep End's data will put his progeny in a very good position for profit and we are convinced this sire could replace his sire with even better carcass data. We expect to see a lot of his progeny in the coming year and he is likely to have a strong influence across the breed. He is in Genex's lineup with semen available from them.

Let's Roll is one of our leading choices to replace Rollin Deep with his outstanding dam, Basin Primrose 2043. He has been getting a lot of attention and we sampled him heavily during our 2017 breeding season for a large calf crop in 2018. Let's Roll's data makes him a go to bull with even more carcass, and the maternal traits we have seen from his dam, half-sisters and progeny are very desirable. We really do believe that with disciplined selection and breeding you can have it all, and Let's Roll is a prime example of that.

Spartacus was our leading sire in 2016 and 2017, and he will continue to be in 2018. We saw a drop in CED on Spartacus with the new data. We often see moves like this when we have an influx of progeny. When we take a closer look, we find that the average Red Angus sire needs calving assistance on 6% to 7% of progeny born out of heifers. With Spartacus, the data was a bit higher than the average, meaning you would provide calving assistance to around 11% of his progeny. Sometimes to get the strong growth and power we see out of his calves, you have to give a little on calving ease. In the big picture, we think Spartacus is a complete bull that will leave any breeding program in a very good position going forward. He is a great sire for us and many of our customers, and his daughters are going to be some of the best females we have in our herd. Semen is available through Select Sires or Accelerated Genetics.

Gladiator is a son out of Spartacus and Laura 158W, the dam of Hard Drive Y120. We have used three sons out of Laura 158W and we are convinced they will continue to move our genetics and our customers' genetics towards profitability. Gladiator has very desirable carcass and, along with the other sons of Hard Drive and Spartacus, we think he is going to hit it out of the park. Semen is available through Bieber Red Angus.

Hard Drive has been the pinnacle of our program the past few years and with good reason. His data hits a lot of the sweet spots across the board and his daughters are quickly becoming some of the best we have. We often get visitors that marvel at his daughters and how moderate they are. Our cowherd in general is much more moderate than many think. We have always tried to keep mature size in check and we feel that Hard Drive and Rollin Deep, along with their progeny, do a great job of that. Hard Drive is a very impressive sire all around. Semen is very limited across the country.

Federalist B543 is a calving ease sire with great maternal strength and he will definitely stack marbling in his progeny. The Primrose cowline has a great reputation for marbling and maternal. We've found that they also consistently offer calving ease but keep BW high enough so calves have some mass to withstand the bitter cold weather we can see in the northern plains. Semen is available through Genex.

Forefront B281 was a pet as a calf and ended up being purchased by Cory with Wagonhound Livestock in 2015. We were flushing his dam, Laura 112W, and decided that we should get him collected and bring him back into the program. In the meantime, Tate Pieper liked him and bought him from Cory. Forefront offers calving ease deluxe with a great set of carcass data. Pieper's data did not get in before the cutoff this year, so we feel confident he is better on growth than his data shows right now. His progeny will likely be some of the best maternal cattle you will find. Semen is available through Bieber Red Angus.

%Rank	1%		%Rank	1%								

Lot 1 has been a standout since he was born. His dam is one of Gene House's, very best cows, posting average progeny ratios of WW 110 and IMF 137. Lot 1 is in the top 1% for both of the new indexes and posts some data that is really hard to match. His sire has been making us take notice and we like what we see in his calves. Overload is going to turn some heads on sale day.

1. **Lot Number** - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in lot number order.

2. **Name** - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam.

3. **Born** - This is the birth date of the animal.

4. **Reg** - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org by going to the animal search page and using this registration number.

5. **Breed** - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR=Red Angus SM=Simmental XX=Unknown. The Unknown cattle are largely cattle where we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.

- AR = RED ANGUS
- SM = SIMMENTAL
- UKN = UNKNOWN

6. **Category**

- 1A=100% Red Angus with no disqualifying features
- 1B=87% to 99.9% Red Angus with no disqualifying features
- II = Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics. Disqualifying features include scurs or horns, insigible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date
- III=Less than 87% Angus blood content

7. **Sire** - Sire of the animal

8. **Paternal Grand Sire** - Sire of the Sire

9. **Paternal Grand Dam** - Dam of the Sire

10. **Dam** - Dam of the animal

11. **Maternal Grand Sire** - Sire of the Dam

12. **Maternal Grand Dam** - Dam of the Dam

13. **MPPA** - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. **AoD** - Age of Dam at the time of weaning the progeny.

15. **ADG** - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. **ADG Ratio** - Average Daily Gain Ratio - The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These

animals have no contemporary group.

17. **WDA** - Weight Per Day of Age -- Weight of an individual divided by days of age

18. **WDA Ratio** - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age, ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. **AScr** - Adjusted Scrotal Circumference--A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet one week prior to the sale and at the sale.

20. **CE** - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree. *** = Use on heifers. Expect less calving difficulty ** = Use on grower heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.

21. **Grw. Sc.** - Growth Score -- This is our recommendation for growth based upon the data and the pedigree. G 6 = maximum growth rating, G 5 = high growth rating, G 4 = moderately high growth rating, G 3 = average growth rating, G 2 = below average growth rating, G 1 = low growth rating.

22. **DNA** - Test ran on this animal.

23. **EPD** - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).

acc - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPDs will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPDs are a more reliable estimate of performance than weight, ratios or other measurements. Understanding ACCURACY. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0 are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

24. **%Rank** - This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and Opportunity Sires, Active Dams, and Non Parent under Two Years of Age.

25. **Wts** - Weight--The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

26. **Ratio** - Ratio--The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET and have no contemporary group.

27. **CED** - Calving Ease Direct - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

28. **Birth Weight EPD** - predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

29. **Weaning Weight EPD** - predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight-- The 205 adjusted weight. This is an indicator of growth up to weaning.

30. **Yearling Weight EPD** - predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight --The 365 adjusted weight. This is a measure of growth from birth to yearling.

31. **Milk EPD** - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

32. **ME** - Maintenance Energy - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to ensure greater accuracy of this EPD.

33. **HPG** - Heifer Pregnancy - predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling

bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to ensure the accuracy of this EPD.

34. **CEM** - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

35. **STAY** - Stayability (STAY) - predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

36. **MARB** - Marbling Score - predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

37. **REA** - Rib Eye Area - predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

38. **FAT** - 12th Rib Fat Thickness - predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness have a detrimental effect on Yield Grade. Fat thickness measured in young seedstock may be an indicator of fleshing ability.

39. **HerdBuilder Index**
 As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:
 • Red Angus bulls mated to cows and heifers (resulting progeny ¼ Red Angus, ¼ Simmental)
 • Replacement heifers retained from within the herd
 • All remaining progeny sold on a quality-based carcass grid.

40. **GridMaster Index**
 While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:
 • Red Angus bulls mated to cows (resulting progeny ¼ Red Angus, ¼ Simmental)
 • All progeny sold on a quality-based carcass grid.

41. **Footnote** - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale and would like to buy cattle, call Craig (605)439-3628 / (605)216-8169 / (605)439-3545) before the sale. Tell us what you are looking for and we will assist in arrangements to help you participate in the offering. We will call you after the sale and inform you of your purchases. **We guarantee your purchase will be satisfactory.**

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 3 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.

2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.

3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.

4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.

5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in northwest Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was

not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975, we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

TOP DOLLAR ANGUS INC.

THE INDUSTRY'S LEADING GENETIC CERTIFICATION & MARKETING COMPANY

Top Dollar Angus is one of the first genetic certification providers for commercial feeder cattle & seedstock producers. Top Dollar Angus is the only one focused exclusively on Angus & Red Angus-based cattle that rank in the Top 25% in growth & carcass traits.

Over 75% of the Bieber Red Angus offering qualified for Top Dollar Angus.

Look for the Top Dollar Angus logo to take your herd's genetics to the next level.

I have used Top Dollar Angus the last two years when I have sold my steer calves on the Superior Bell Ringer Sale.

Kenny Stauffer was very helpful in getting my calves qualified into the program and getting them in front of more potential bidders. Craig with Bieber Red Angus and Kenny with Top Dollar Angus, together worked hard to help us get a premium price for our genetics.

Mark Gross

We are always looking for ways to add value to our calf crop and the Top Dollar Angus program has helped us do that. Since our cattle have qualified for the Top Dollar program, that little logo has put our calves in front of a lot of potential cattle feeders that are looking for cattle that have known genetics that are predictable for feedlot performance and carcass merit and are willing to pay a premium to purchase the calves. This was proven the last 2 years we have sold our calves under the TDA program as they sold at the top in our base weight and delivery date group on Superior Livestock receiving around \$60 per head advantage over other calves. So the Top Dollar Program has definitely been working for us.
