SALE ORDER

Sale order will be catalog order. Any variations from catalog order will be announced prior to the sale.

EPD INFORMATION

In this catalog we have included data on the core performance traits. With the ever-expanding database predictions on more traits than ever before, we have had to narrow our EPD selection to these core items. If you would like additional information on any traits not listed, please let us know. The EPDs provided are as of the date listed. Because BOLT EPDs are updated weekly, we will provide current EPDs on sale day.

SCHEDULE OF EVENTS

WEDNESDAY, NOVEMBER 10

8:00 am	Sale cattle available for viewing all day
9:00 am	Coffee and supplement sheets available in sale barn

THURSDAY, NOVEMBER 11

8:00 am	Sale cattle available for viewing
9:00 am	Coffee and supplement sheets available in sale barn
11:00 am	Lunch will be served in sale barn
1:00 pm	Sale time
5:00 pm	Dinner served following the sale

SALE LOCATION

Bieber Red Angus Ranch, 11450 353rd Ave, Leola, SD 57456

The ranch is located nine miles west of Leola on Highway 10. When you see the Bieber Red Angus Ranch sign, turn north and go 1/2 mile.

DELIVERY POLICY

Please review our delivery policy on Page 4 for info on delivery costs and central delivery points.

SUPPLEMENT SHEETS

Supplement sheets will be available on sale day and will include actual scrotal measurements and actual weights.

INSURANCE

Mortality and Accident, Sickness and Disease Infertility Insurance will be available sale day by Katie Williams of Martin-Trudeau Insurance. Contact Katie at (605) 770-9986 with questions.

DVAUCTION

The sale will be broadcast live over the internet through DVAuction. To bid from your computer during the sale, complete this simple two step process:

- Visit www.dvauction.com or call (402) 474-5557. Register by entering a User Name and Password. Enter your personal information on the next screen.
- Click "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale. We will also provide you with a buyer number. After the sale, Bieber Red Angus will contact you to make arrangements for payment and delivery of your purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to bid during the sale. Any questions, please contact DVAuction at (402) 474-5557 or support@dvauction.com. We recommend that you register at least one day before the sale for online bidding.

CATALOG LETTER

Welcome

TO OUR 2021 FALL PRODUCTION SALE!

We want to thank each of you for taking the time to learn about our operation and take a deeper look at the cattle we have to offer at this sale. We work hard to provide our customers with cutting edge genetics that excel in all segments of the beef industry. To us that means breeding for growth, fertility, calving ease, maternal and carcass traits. These traits should come in a functional package, with good feet, udders, and disposition, without giving up style and eye appeal. We truly believe through focused selection, you can have it all.

Our program has been an influential player in the Red Angus breed, and the cattle industry as a whole, for over 50 years. Through those years, we have seen many different seedstock breeders come and go - some much quicker than others. We use our experience and knowledge of development to produce seedstock cattle that will offer longevity and productivity. That means you get a product that is far above the average of the industry.

Our crew is passionate about making cattle better. To do that, we have learned a lot about the basics of the cattle business. We find ourselves constantly monitoring the information in the industry to make sure we have the knowledge that will benefit you when you need advice. When new technology becomes available, we analyze it to make robust decisions on how to use it to be more profitable. We believe the future is Red Angus, and these cattle are a benefit to the profitability of commercial cattlemen in hotter climates. The red hide color is a big factor in improving female fertility. We always get the question, 'what about the black hide premium advantage?' Our answer is this - we believe the red female negates any added premiums of a black hide through the value of better adaptation to typical climates in North America, better fertility, better disposition, and longevity in the herd.

Our program has a focus on profit that is second to none. We use that focus on every part of our program and daily work to give you the consistency you want in your cowherd. We have always felt good seedstock in volume pushes prices to a level every cattle producer can afford. After reading this, I personally hope you take the time to do one of the following things:

- Come to our ranch and look at this offering.
- Go to our website and look at our videos.
- Call me or anyone under SALE CONTACTS for a personalized bull/female list.

We know our success depends on customer satisfaction. Repeat customers, long-standing relationships and real genetic value are what we aim to produce. We continue to promise that if you have a problem, we will do our best to make sure you are satisfied.

On sale day, we look forward to seeing our customers that have become friends and meeting new customers that we hope to have a long-standing relationship with. We are excited to see you at the BIEBER FEVER FALL PRODUCTION SALE.

CRAIG J BIEBER

Our family from left: Presley, Eric and Megan Payne, Kylie, Peggy and Craig Bieber, Londyn, Kristin and Jake Harms, Hartley. Not pictured: Holton Harms

MEET THE TEAM

CRAIG AND PEGGY BIEBER

Craig and Peggy are the owners and operators of Bieber Red Angus. As CEO, Craig oversees the operation of the ranch and coordinates the selling of more than 550 Red Angus bulls each year. Peggy is his partner and the full-time office manager at the ranch. She manages all bookkeeping, cattle record entry, and sale clerking. Together, they work diligently to market exceptional cattle to seedstock and commercial cattlemen alike.

JAKE AND KRISTIN HARMS

Jake and Kristin are Craig and Peggy's son-in-law and daughter. Jake manages the feeding plan for the Bieber herd and handles cattle sales with Craig, along with his other ranch duties. Kristin handles the marketing plan and works in the office with Peggy. Both are committed to the future and success of the operation.

CRAIG HOWARD

Craig is the cow boss at Bieber Red Angus. He manages the day to day operations of the ranch including breeding, calving, overall cattle care, and maintenance. He has been with the ranch for more than 14 years and knows all of the intricacies of the BRAR herd and operation.

DILLON SPURR

Dillon is a herdsman and AI technician at the ranch. He handles cattle care including calving and breeding, along with other general ranch duties. Dillon knows our herd well, and brings an experienced and valuable skillset of cattle care to the operation.

LOIS BIEBER

Lois is a co-founder of Bieber Red Angus. She and Ron, who passed away in August 2020, established the Red Angus herd in 1968 with proven cows from leading breeders. Lois resides in Aberdeen but continues to help with the sale and visits often in her free time!

JACKSON SIMONDS

Jackson is a herdsman and our newest team member. He focuses on the maintenance of all of our farm and ranch equipment, and also helps with feeding and other ranch duties. He came to us all the way from North Carolina, and we are excited to see him join our team.

DELIVERY ARRANGEMENTS

DELIVERY ARRANGEMENTS AND PRICING

We have outlined our delivery arrangements and pricing below and we encourage each of you to review the details. Please stop by our check out counter prior to leaving the sale to coordinate delivery plans on your animals. If you are not onsite on sale day, Craig will be in touch with you within a week of the sale to coordinate the delivery of your purchases. We appreciate your patience and assistance when organizing delivery.

DELIVERY PRICING

As always, we will continue to offer free delivery to **CENTRAL POINTS** in South Dakota and North Dakota. For all other states, delivery will be charged to **CENTRAL POINTS** per head based on the pricing outlined on the map below. Pricing will be charged based on your physical address. Delivery charges will be added to each invoice at check out, unless you plan to load out within 7 days of the sale.

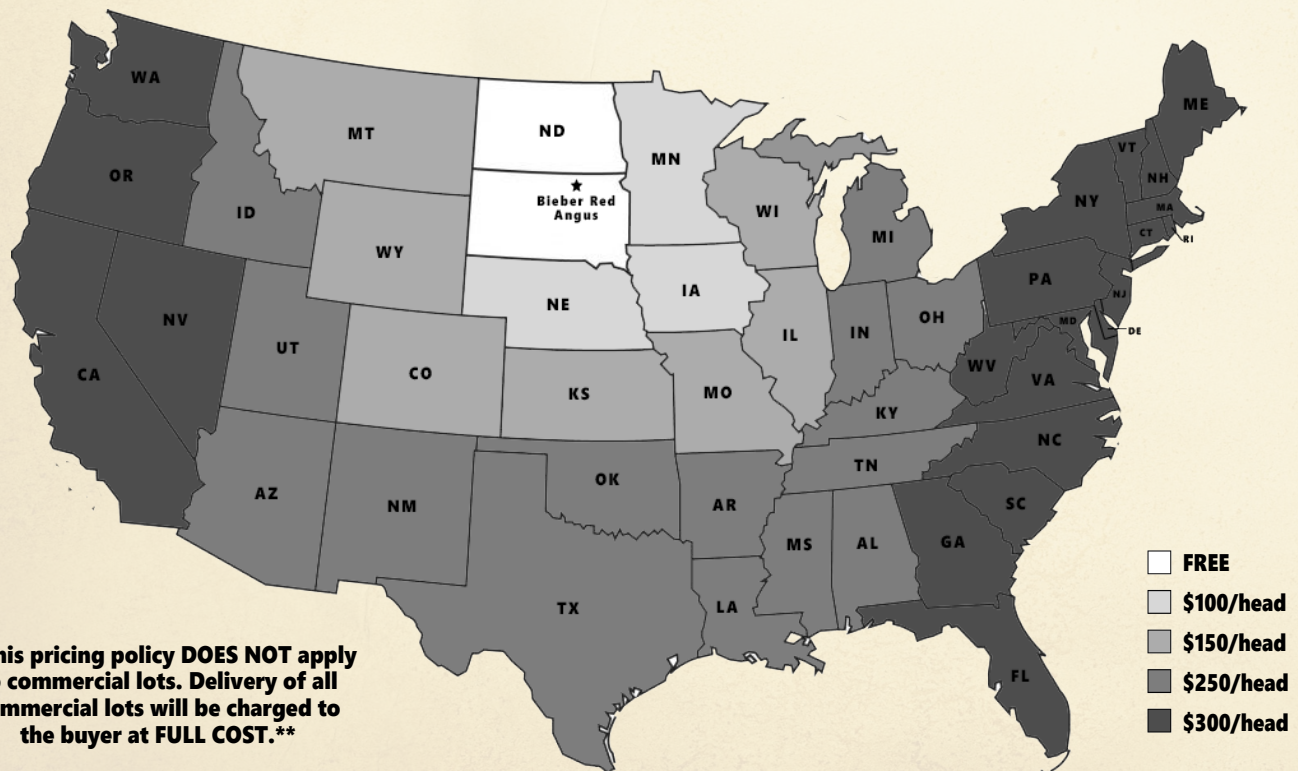

CENTRAL POINTS

All deliveries will be organized to **CENTRAL POINTS** within the state. Delivery will NOT be organized to your home or ranch. Loads are delivered by semi truck and require drop off points along their route with a loading chute and location to house livestock. You are expected to meet the semi truck driver at the central drop-off point as communicated by them. Central points for delivery include auction barns, vet clinics, and other locations determined by the semi truck driver at the time of delivery. Pricing to these central points will be charged to you based on your physical address. The driver will be given your contact information and will communicate with you regarding the drop off time and location.

FEEDING ARRANGEMENTS

If you are not ready to receive your animals when we plan to deliver to your area, feeding arrangements are available for a charge of \$3.50 per day per animal. Please coordinate these feeding arrangements after the sale.

We ask for your cooperation in arranging dates and the pick up of your cattle at central delivery points within your state. This will keep the cattle from being on the semi truck longer than necessary and help to get your animals to you with the least possible stress and in the best possible condition. We appreciate your understanding of our delivery policy and look forward to working with you on the delivery of your cattle. Please let us know if you have any questions!

****This pricing policy DOES NOT apply to commercial lots. Delivery of all commercial lots will be charged to the buyer at FULL COST.****

SALE TERMS

HEALTH

Ashley Vet Clinic will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. We have tested our replacement heifers for BVD since 2014 as part of our surveillance program and found no positive BVD carriers. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positives. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogryposis Multiplex(AM) (Curly Calf Syndrome), Neuropathic Hydrocephalus (NH) and any other known genetic defects. With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch's interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE

We score for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull should be used on cows under standard conditions with little or no difficulty. This recommendation is a system we use to help our customers with calving ease selections.

Birth weights are highly affected by environmental factors. Research has indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures. The University of Nebraska conducted a three-year study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies comparing calves born in the southern US to calves born in the northern US. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree, CE EPD, BW EPD and Genomic data.

FEEDING

Feeding arrangements are available on all lots and will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

GAIN TESTING

The summer born bulls were weaned in October of 2020 and yearling weights were taken in May of 2021. All summer born bulls were placed on feed in preparation for the sale in September.

COLOR

All animals are red unless otherwise indicated in the footnotes.

BREEDING SOUNDNESS EVALUATION

Breeding soundness screenings will be performed in November before the sale. We fully guarantee that these bulls will pass the breeding soundness evaluation before the breeding season in 2022 if the bulls are managed properly. Part of being maintained properly means being on a plan of nutrition where bulls maintain or gain weight. The bulls will be weighed the week prior to the sale when the breeding soundness evaluation is done. We recommend that all bulls be tested 4 to 6 weeks prior to your breeding season. Our guarantee will require that the bull weigh the same or more than when we did the breeding soundness evaluation in November 2021. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reasons. We will do our best to make sure you are satisfied. Keep in mind that the development of any bull is inhibited by inadequate nutrition. If you have any questions regarding breeding soundness evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryo transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS

All naturally born calves at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INTERNET AND ABSENTEE BIDDING

We would prefer for you to be in attendance on sale day. Realistically, we know that there will be scheduling conflicts and distance limitations. In these instances, we have arranged a conference call dedicated to bidding so you can participate in the sale. We will have one phone line available and can accommodate 20 to 30 bidders. Please call the office prior to the sale and register as a prospective buyer. We need to warn you of complications we have experienced with the conference call including the volume of the phone and the rapid pace at which our sale moves. For internet bidding information, see the DVAuction section.

If you are unable to attend and you feel comfortable doing so, you also have the option to leave your bids with the Bieber crew, Auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using this service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specifications. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle and if they don't meet your expectations, you can return them. If possible, please evaluate the offering onsite prior to sale day. We will also post video of each lot on our website.

BREEDING DATA

Breeding data on the bred females, including sex of pregnancy and date of calving, is verified by ultrasound and is an estimate. Many years of ultrasound data has proven it is 99% accurate. This data is verified to the best of the veterinarian's ability depending on embryo age. Some bred females have two sires too close to call by ultrasound and we have indicated that DNA will be necessary to determine the sire in the footnotes.

RED ANGUS BRED HEIFERS

MULTIPLE SIRE PASTURES

As many of you know, managing single sire natural service pastures requires lot of time, land, and management. That method is rarely what's best for the grass management of the operation. We breed these heifers for a little over two cycles in our Hoop barns, before going to grass with the entire group and enough bull power to cover repeated heats. The natural service sires we use are selected for calving ease from breed-leading programs. We anticipate little - if any - calving difficulty. We take DNA on every calf born on our ranch and some progeny out of these bred heifers will need DNA testing to determine sire which is noted in the footnotes. Below is a little about the three natural service sires.

TJS GATE KEEPER F106

We selected Gate Keeper from the annual "Red Truck" sale from the Shick program. He's stout, good looking, and a very different pedigree for us. His sire was one of the leading Lancer R017 sons and his dam is a Berry Cherry daughter that's done a great job.

ALC MR COMPLETE H41

We purchased this sire in Wedel's 2021 Sale. Jason Anderson's family bred the bull and cooperate with the Wedels. We've been watching the Complete 7000E progeny and this one was a standout all year. He posts some very impressive data and offers a phenotype with a lot of shape.

PIE FRANCHISE 9031

We found this sire at Pieper's 2020 Sale. His dam is a full sib to PIE ONE OF A KIND 343, an exciting sire that has been used extensively in the Pieper program. He scanned for IMF at the top of his group and his GM EPD is at the top of the breed. Based on both sides of his pedigree, we wouldn't be surprised if this sire produces great females.

Unsexed calf due 2/16/2022 sired by TJS Gate Keeper F106. Stockmarket's progeny have been exciting from the start and are getting a lot of use in programs across the country. We chose to lead off the sale with this stout matron whose dam, granddam, great granddam, and great great granddam where all in our ET program. With the data she posts, it's easy to see why. She comes bred to TJS Gate Keeper F106, who was a high seller in the 2019 Shick sale. We have a few Stockmarket daughters in production and they look like they are going to be great cows. Don't miss this one as she looks to be on the same path.

BIEBER PRIMROSE 175H

Heifer calf due 3/4/2022 sired by either **ALC MR COMPLETE H41**, **TJS GATE KEEPER F106**, or **PIE FRANCHISE 9031**. DNA Testing will be necessary to determine sire. Lot 2 stacks Forefront, Stockman, and the Primrose cowline - and has the data to back it up. She also stacks the deck in your favor on carcass. A speaker from Agri-Beef at the Red Angus convention said that his group could sell 40% more beef if it qualified in the upper 2/3rd of Choice and Prime. This lot will put you in a position to do just that.

Heifer calf due 3/5/2022 sired by either ALC MR COMPLETE H41, TJS GATE KEEPER F106, or PIE FRANCHISE 9031. DNA Testing will be necessary to determine sire. We don't think there is a single person that doesn't believe that good cowlines matter in the cattle business. Lot 4 is a maternal sister to Lot 1 and out of an excellent cowline. Stack that with Stockmarket, and this heifer calf is bound to be a winner. If you study this pedigree, you will notice that the cowline is Adelle on both sides, outlining a great opportunity for line bred success.

Bull calf due 3/4/2022 sired by either ALC MR COMPLETE H41, TJS GATE KEEPER F106, or PIE FRANCHISE 9031. DNA Testing will be necessary to determine sire. This female is a truck and comes from the heart of our ET program. She lines up two ET donors on the bottom side of her pedigree. Lot 5 presents powerful data and phenotype along with a very maternal pedigree out of the Peacemaker daughters. A full sister sells as lot 7.

BIEBER SURPRISE 561H

Heifer calf due 3/1/2022 sired by either **ALC MR COMPLETE H41**, **TJS GATE KEEPER F106**, or **PIE FRANCHISE 9031**. DNA Testing will be necessary to determine sire. Lot 6 posts GridMaster numbers at the top of the breed. It is pretty hard to beat her data across the board on growth, milk, and carcass. Her dam had several sons that sold at the top of our offering this past spring, one of which went to Neo-Sho Farms out of Missouri. Kirby is known for selecting some of the best sires in the industry, and we think he did that again with a son out of this line.

COMMERCIAL BRED HEIFERS

Bieber Red Angus is offering several groups of commercial bred heifers from our customers' operations. Each lot description outlines how that lot will be sold. **All commercial lots will be available to view at the Ranch on sale day!** Please feel free to contact the producer at any time with questions.

35 TO 40 HEAD OF RED ANGUS HEIFERS

**Pearl Creek Cattle Company, Cavour, SD – Shawn Miner (605) 830-2750 and
Donnie Miner (605) 354-7070**

These are home raised heifers that have been bull bred to sons of Bieber CL Stockmarket E119. The bulls were turned out June 1 and the heifers will calve for 35 days from the beginning of March. These heifers have been on our sale for several years and have become widely known to have great disposition and very good maternal traits. The Miners have been using Bieber Red Angus bulls since 1999.

These heifers will be ultrasounded for calving date and sorted into uniform calving groups to be sold in sets of five or more. Five heifers will be tagged with the first lot and consecutively with every five after that. They will sell in lot tag order. Each group will be tagged in a series, so the winning bidder will have the right to buy the first five and as many as they want within that lot in increments of five at that price. Video will be available through our website prior to the sale.

35 TO 40 HEAD OF RED ANGUS HEIFERS

RICK AND SHELLY AMMANN, WILMOT, SD – (605) 949-4137 OR (605) 938-4137

These are home raised heifers that have been AI bred on June 10 and 11 to Bieber CL Atomic C218. The heifers were then turned out from June 13 to July 26 with two sons of Bieber CL Stockmarket E119. The heifers will calve for 45 days beginning on March 5. The steer calf mates to these heifers have topped the Superior Sale in Sheridan, WY for several years and have averaged around 615 lbs upon delivery in the first week of November. The Ammanns have been using Bieber Red Angus bulls since 1991 and Red Angus bulls since 1988. They were awarded the Red Angus GridMaster award in both 2018 and 2019.

These heifers will be ultrasounded for calving date and sorted into uniform calving groups to be sold in sets of five or more. Five heifers will be tagged with the first lot and consecutively with every five after that. They will sell in lot tag order. Each group will be tagged in a series, so the winning bidder will have the right to buy the first five and as many as they want within that lot in increments of five at that price. Video will be available through our website prior to the sale.

40 HEAD OF RED ANGUS HEIFERS

BRENT WOLFSWINKEL FAMILY, CHEROKEE, IA – (712) 221-5394

Brent purchased these heifers from Edwin Perry this past spring with the intention of breeding them and selling them on this sale. The Perrys have been breeding commercial Red Angus cattle for many years on the Wyoming/Nebraska border in the small town of Van Tassel, WY. These heifers have been AI bred on May 2 to Bieber CL Stockmarket E119. The heifers were then turned out for 30 days with two separate three-star calving ease sires. One of these sires is a maternal brother to Bieber Iron Warrior C124 and Bieber Maximus E294. Around 75% of the heifers are AI bred and due to calve 2/4/2022. The balance will calve for 30 days beginning on February 13.

These heifers will be ultrasounded for calving date and sorted into uniform calving groups to be sold in sets of five or more. Five heifers will be tagged with the first lot and consecutively with every five after that. They will sell in lot tag order. Each group will be tagged in a series, so the winning bidder will have the right to buy the first five and as many as they want within that lot in increments of five at that price. Video will be available through our website prior to the sale.

BIEBER CL ADELLE 575D

Unsexed calf due 5/29/2022 sired by **BIEBER CL STOCKMARKET E119**. This may be one of the best Hard Drive daughters to ever sell. She is the dam of Energize F121, a bull co-owned by ABS that has had a lot of attention. Craig and Lindley selected this cow's dam and she has done an outstanding job. Lot 66 is a moderate cow with a good udder and data to back it up. She dropped back a calving season through no fault of her own. We flush a group between calving and breeding and it puts some extra challenges on getting them bred back. Her Stockmarket calf alone will likely pay for the cow. This may be one of the most exciting lots at our fall sale in quite a few years.

RED ANGUS BRED COWS

ABOUT THE BRED COWS

Every year we get the question about why and how we select the cows for this offering. One reason is because we breed a large number of replacement heifers every year. We feel they offer the best genetics we've produced to date and want to utilize that. We offer a small selection of those heifers that may fall outside of our calving window or because we have a limited land base and just can't keep everything. When we add these heifers back into the breeding herd, we have to disperse with some of our older cows to make room.

We also focus on keeping our herd consistent and our genetics moving forward. That means we need to disperse our mature cows at a certain point. After doing the math, we believe these cows breakeven for our operation at seven years of age. They still have a lot of life and fertility left in them at this point, but they've served their purpose in our herd. In our founder Ron's time, we would disperse the mature cows every three or so years. A dispersion like that was a large undertaking in more ways than one. It created a strain on our work load and didn't always match up well with challenges outside of our control like drought. Additionally, a large increase in income every three to four years raised a red flag to the IRS and we in turn had to undergo an audit almost every time. Which was time we could have spent making our cattle better!

Finally, we also offer any female that falls outside our normal calving window in order to lighten our workload in March, a time when the weather and our sale schedule make heavy calving a challenge. We strive to make things simpler for ourselves and our customers. We believe and results have shown that these cows will fit other programs. Many of our sale cows have gone on to be very successful for their new owners. One that always comes to mind is Adelle 7226, who celebrated her 20th birthday last year and was still producing! These cows make a great offering and are an excellent genetic opportunity for Red Angus enthusiasts.

MULTIPLE SIRE PASTURES

As many of you know, managing single sire natural service pastures requires lot of time, land, and management. For our May-June calving cowherd, we AI breed prior to turning them out as one big group. Because of the size of this group, we require a large amount of bull power to cover heats.

In the following pages, you may find cows with a breeding footnote that reads, "...sired by MULTI SIRE GROUP." Below are the bulls that are included in that multi sire group.

RED ANGUS BRED COWS

MULTIPLE SIRE PASTURES

As many of you know, managing single sire natural service pastures requires lot of time, land, and management. For our May-June calving cowherd, we AI breed prior to turning them out as one big group. Because of the size of this group, we require a large amount of bull power to cover heats.

In the following pages, you may find cows with a breeding footnote that reads, "...sired by MULTI SIRE GROUP." Below are the bulls that are included in that multi sire group.

BIEBER WARHEAD H402

This lead off bull lot is a Warhead son that posts growth at the top of the breed. We expect Warhead to be a great maternal producer and this son stacked on Driven will do exactly that. Lot 171 has an outstanding Driven-sired dam and has the potential to be as good as any sire we've offering in our fall sale.

RED ANGUS BULLS

BIEBER STOCKMARKET H608

Stockmarket progeny were impressive this spring and this lot will be no exception. His Rollin Deep sired dam is backed with two generations of embryo transplant donors. His data puts him in pretty exclusive company being in the top echelon for ProS, HerdBuilder, and Gridmaster.

BIEBER EP FOREFRONT H426

Lot 174's dam posts an impressive MPPA of 106. This Forefront son has an opportunity to be every bit as good as his sire. This is this dam's first natural calf and she's done an outstanding job. Jim Shirm used to always say that there are more Kentucky Derby winning first foals than any other kind. This would be her first very impressive son. It probably won't be her last.

Every indication is that the Warhead sons will make great females with his HerdBuilder data being in the top of the breed and a history of solid dams that his pedigree has produced. His dam goes back to the dam of Makin Hay who was another outstanding female producer. It's hard to go wrong with how stacked these pedigrees are.

IGENITY GENOMIC TESTING

Igenity® – Confident Selection

Introducing our new beef genomics portfolio

Beef genomics empower your future

Select, manage and market cattle with more confidence. Evaluate maternal, performance and carcass traits in one step. Focus time, feed and resources on young breeding stock of verified merit.

- Invest in heifers that improve stayability and reproduction.
- Raise cows tailored to your production and grazing goals.
- Confidently select for grids, value-added marketing programs and retained ownership.

Affordable power

The new Igenity portfolio provides affordable tools to predict performance in your breeding stock and saves years in achieving your herd-improvement goals.

Leverage crossbreeding plus DNA selection

Igenity is designed for crossbred and straightbred cattle of six key breeds. This unique design helps you use heterosis plus DNA scores to make faster progress on your goals.

The U.S. Meat Animal Research Center has shown that lifetime production in weaning weights increased about 36 percent due to heterosis in British-cross cows. Longevity increased 16 percent.

Add in Igenity and you can put targeted selection pressure on traits your heifers will pass on to their offspring. By combining Igenity and crossbreeding, you get the benefits of both. Big advantage.

Maximize potential, generation after generation

Igenity is about opportunity – and making more confident decisions about the future.

A study by the Red Angus Association profiled 91 Red Angus calves with Igenity and followed them through harvest. The top 25 head scored 2.4 Igenity points higher for ADG and marbling than the bottom 25 head. The top calves netted \$50 per head more at harvest.

Improving a 250-head cow herd's Igenity weaning weight scores by one point would increase calf-crop production by 1,750 pounds annually.

Fertility traits are considered lowly heritable. But even modest gains are impactful on your bottom line. A one-point increase in Igenity stayability scores would reduce your cow replacement rate by 48 heifers needed to maintain a 250-cow herd over six years.

Holding back a heifer is a risk of \$2,000 per head in costs and lost opportunity. A reduction of 48 replacement heifers would save around \$96,000. Plus, it may take years to see that you retained the best. With Igenity, you can more confidently select the heifers that will protect your investment and maximize potential in each generation.

Commercial Cattle Products

Igenity Beef Profile/Crossbred and straightbred heifers

Get 16 maternal, performance and carcass traits plus parentage—ideal for maternal line improvement (and bulls without EPDs).

- **Maternal:** Birth Weight, Calving Ease Direct, Calving Ease Maternal, Stayability, Heifer Pregnancy, Docility, Milk
- **Performance:** Residual Feed Intake, Average Daily Gain, Weaning Weight, Yearling Weight
- **Carcass:** Tenderness, Marbling, Ribeye Area, Fat Thickness, Hot Carcass Weight
- **SeekSire™** parentage

Igenity Angus Gold Profile/Heifers

Get 15 maternal, performance and carcass traits plus parentage—a powerful profile for Angus and high-percentage Angus commercial replacement heifers.

- **Maternal:** Birth Weight, Calving Ease Direct, Calving Ease Maternal, Heifer Pregnancy, Docility, Milk, Mature Weight
- **Performance:** Average Daily Gain, Residual Average Daily Gain, Weaning Weight
- **Carcass:** Tenderness, Marbling, Ribeye Area, Fat Thickness, Carcass Weight
- **SeekSire** parentage

STOCKMARKET E119

Stockmarket's first set of progeny sold last spring and they confirm that he delivers on his breed-leading genetic merit with outstanding phenotype. Some sires have the kind of prepotency that produces a higher level of consistency in their progeny from top to bottom. Stockmarket is proving to be that kind of sire. He may be the outcross pedigree that the Red Angus breed is looking for.

STOCKMAN E116

We used this Stockman 4051 son heavily during the 2019 and 2020 breeding seasons and like the sons he produces. They offer slightly more frame than Stockmarket. We think his progeny have great phenotype and are excited to see how they scan. With his excellent Iron Ore dam, he is not likely to disappoint.

PJE
Stockman
4051

REFERENCE SIRES

WARHEAD F120

Warhead sold to Northern Lites in 2019 and was a favorite of buyers because of his outstanding performance. He is an Atomic C218 son which means he has notable calving ease data as well. We sampled him early and Northern Lites used him on their heifers. His progeny calved quite easy and with his kind of growth and pedigree, it is easy to see that he is stacked for prepotency. Warhead's progeny seem to have a bit more frame and performance than their sire from what we have seen so far. He is a feature in our Spring semen catalog - check that out on our website BieberRedAngus.com

FOREFRONT B281

Forefront was always a favorite of ours and our customers for quiet disposition and he gives nothing up on measureable traits. His data shows he is a standout for carcass and we have been excited about the number of calves that come to the top of the herd not only out of him, but out of his daughters as well. He also hits it out of the park with the new ProS Index. Semen is very limited at this point as he was injured and will no longer be producing.

SPARTACUS A193

Spartacus is a complete bull that will leave any breeding program in a very good position going forward. His data is hard to match for both seedstock and commercial cattlemen and his progeny have that extra look that everyone wants in their calf crop. Many of our customers have tied into his sons, and those feeder cattle will be in high demand. His daughters look to be some very solid females. Everyone is very pleased with the disposition on his progeny as they offer a great temperament. With over 1,000 registered calves to his credit, he has proven that he is one of the more balanced sires in the breed.

FRANCHISE 6305

Franchise is a calving ease sire working at Select Sires that excels in phenotype and has excellent carcass merit. We really like the impressive phenotype he produces with moderate frame on his progeny. We have several sons working natural service in our herd that have given us a great offering and are likely a replacement for their sire as well.

REFERENCE SIRES

ROLLIN DEEP Y118

Rollin Deep has been one of those rare sires that truly elevates the breed. He was an impressive individual from the start, posting outstanding data with one of the deepest phenotypes we had ever seen. His progeny proved impressive and our customers found that his sons complimented their programs and added muscle, great data, and superior style. Our attention then turned towards his daughters who continue to do an outstanding job. Rollin Deep has become the epitome of our program. Over 1400 progeny registered with the RAA, his influence has been felt across the breed and we have several great sons that are now making their own mark on the industry.

HARD DRIVE Y120

Hard Drive has been the pinnacle of our program in the past and for good reason. He sold to Select Sires in our 2013 spring production sale. When you study Hard Drive's data, you are pretty hard pressed to find a sire that will post as many traits with a high percent rank like he does. Hard Drive produces low birthweight and breed leading growth and his progeny are in high demand.

LRL POINT BLANK H23

H23 was an impressive bull that caught Craig Howard's eye early in the bull season. We had been looking for Merlin sons as a lot of them stood out. This bull comes with very impressive data, growth in the top of the breed, and great disposition.

Lot 1 has been a standout since he was born. His dam is one of Gene Rouses, very best cows, posting average progeny ratios of WW 110 and IMF 137.

1. Lot Number - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in lot number order.

2. Name - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam.

3. Born - This is the birth date of the animal.

4. Reg - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website by going to the animal search page and using this registration number.

5. Breed - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are:

- AR = Red Angus
- SM = Simmental
- XX = Unknown

The Unknown cattle are largely cattle we weren't able to prove parentage on in the Durheim herd. The unknown breed is either Simmental or Red Angus in the Durheim foundation cattle.

6. Category -

- 1A = 100% Red Angus with no disqualifying features
- 1B = 87% to 99.9% Red Angus with no disqualifying features
- II = Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying features. Disqualifying features include scurs or horns, ineligible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date.
- III = Less than 87% Angus blood content

7. Sire - Sire of the animal

8. Paternal Grand Sire - Sire of the Sire

9. Paternal Grand Dam - Dam of the Sire

10. Dam - Dam of the animal

11. Maternal Grand Sire - Sire of the Dam

12. Maternal Grand Dam - Dam of the Dam

13. MPPA - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. AoD - Age of Dam at the time of weaning the progeny.

15. ADG - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. ADG Ratio - Average Daily Gain Ratio -- The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. WDA - Weight Per Day of Age -- Weight of an individual divided by days of age.

18. WDA Ratio - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. AScr. - Adjusted Scrotal Circumference -- A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet one week prior to the sale and at the sale.

20. CE - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree.

*** = Use on heifers; expect less calving difficulty

** = Use on growthy heifers and cows; expect moderate calving difficulty on heifers and very little difficulty on cows

* = Use on cows; expect difficulty on heifers and some to very little calving difficulty on cows

21. Grw. Sc. - Growth Score -- This is our recommendation for growth based upon the data and the pedigree.

- G6 = maximum growth rating
- G5 = high growth rating
- G4 = moderately high growth rating
- G3 = average growth rating
- G2 = below average growth rating
- G1 = low growth rating

22. DNA - Test ran on this animal.

23. EPD - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g. lb., in., etc.).

acc - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPDs will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPDs are a more reliable estimate of performance than weight, ratios or other measurements. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0, are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

24. %Rank - This is the percentage rank of the EPD within the type of animal. Rank groups include Proven and Opportunity Sires, Active Dams, and Non Parent under Two Years of Age.

25. Wts - Weight -- The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

26. Ratio - The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET and have no contemporary group.

27. CED - Calving Ease Direct -- Predicts the probability of calves being born unassisted out of two-year-old heifers. Producers want live calves born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

28. Birth Weight EPD - Predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

29. Weaning Weight EPD - Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight -- The 205 adjusted weight. This is an indicator of growth up to weaning.

30. Yearling Weight EPD - Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight -- The 365 adjusted weight. This is a measure of growth from birth to yearling.

31. Milk EPD - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

32. ME - Maintenance Energy -- Predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cowherd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Includes selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to ensure greater accuracy of this EPD.

33. HPG - Heifer Pregnancy -- predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool

which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to ensure the accuracy of this EPD.

34. CEM - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

35. STAY - Stayability (STAY) -- Predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

36. MARB - Marbling Score -- Predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

37. REA - Rib Eye Area -- Predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

38. FAT - 12th Rib Fat Thickness -- Predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness have a detrimental effect on Yield Grade. Fat thickness measured in young seedstock may be an indicator of fleshing ability.

39. HerdBuilder Index - As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny ¾ Red Angus, ¼ Simmental)
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

40. GridMaster Index While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny ¾ Red Angus, ¼ Simmental)
- All progeny sold on a quality-based carcass grid

41. Footnote - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

How it Works:

Our program begins with a FREE genetic evaluation based on the current/past herd sires used in your program. We evaluate the sires used in your herd based on their growth and carcass merit characteristics. A herd that qualifies for Top Dollar Angus has cattle that are at least 50% Angus or Red Angus and also ranks in the top 25% of its respective breed for growth and carcass merit.

Once qualified, our team provides boots on the ground to share this valuable information with buyers looking for high quality cattle that will go on feed and perform. Our team has experience coast to coast and works directly in all channels (video, local auction, direct and internet). Plus, we have the resources to provide a very fast turn-around.

What our Customers Say:

"Top Dollar Angus is a program that benefits all levels of the industry. The seedstock producer is rewarded for providing superior genetics to the commercial cattleman, who in turn supplies the feeder with efficient cattle that will produce top-end carcasses. As Top Dollar Angus continues to raise their qualifying standard, these cattlemen will have to up their game to purchase the genetics that will fit the program. These cattlemen will see a return on investment when offering reputation feeders at market time."

TERMS AND CONDITIONS

The Red Angus Association Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids. His decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull, and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch's interest then becomes in herd use only. Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost, provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use, and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed export to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction block and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

All guarantees are limited to the amount of the purchase price.

Open females have not been served and are so guaranteed.

ABSENTEE BIDDING

If you can't attend the sale and would like to bid absentee, call Craig at (605) 439-3628 or (605) 216-8169 prior to the sale. If you tell us what you are looking for, we will assist in making bidding arrangements. We will call you after the sale and inform you of your purchases. We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have telephone bidding available by conference call. If you wish to bid over the phone, please register before sale day.

INTERNET BIDDING

See page 1 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder. The Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

WE GUARANTEE YOUR PURCHASE WILL BE SATISFACTORY.
